STRIKER®
SIMULATOR

Life-saving training. Cost-saving conditions. The Striker® Simulator safely trains your crew for situations that would otherwise be impossible or costly to recreate. With authentic Striker vehicle operating tools and graphics that are customizable to your airport, you can tailor a training program as real as the runway.

STRIKER SIMULATOR

ALL NEW BODY. SAME SOUL.

More preparation. Less limitation. Train on a laptop or a fully immersive wrap-around simulator. The Striker Simulator can be configured around every budgetary and airport protection need.

ADDITIONAL FEATURES

- Incorporates airport-specific runway scenarios
- Covers an extensive range of training initiatives in one program – from driving a Striker vehicle to full incident command
- Simulates lifelike atmospheric elements, such as rain, wind and evening darkness
- No waste of water, fuel or foam provides a green solution for training
- Operators can train on scenarios that cannot be realistically or economically replicated in conventional training – using any type of aircraft
