

# Device as a Service with Apple

CompuCom

Authorized  
Reseller

## Empower Your Employees with Ease

Reap the benefits of employee choice, full organizational visibility, budget-friendly flexibility, and so much more...

The shift to more remote work means employees need flexible and easy-to-use technology that lets them seamlessly move between home and office whenever they need to. Device as a Service (DaaS) offers the latest mobile solutions to meet today's new challenges. When paired with Apple® devices, like the new iPad Pro, the benefits for both your employees and your business are endless.

### **BENEFITS FOR YOUR BUSINESS**

#### **Greater Agility:**

A pay-per-use model with a single contract for the entire Apple device management life cycle

#### **Cost Leadership and Financial Flexibility:**

Lower cost of ownership with one fixed monthly price per seat with flexible financing options

#### **Save on Support Costs:**

As many users are familiar with Apple devices at home, the demand for support is much lower

### **BENEFITS FOR YOUR IT TEAM**

#### **Compatibility with**

#### **Countless Applications:**

Apple devices are designed to work with your existing infrastructure, meaning an easy transition

#### **Zero-Touch Deployment:**

Apple devices are good to go upon arrival, easily integrating with your users' platforms and mobile devices

#### **End-to-end Management and Simplified Device**

#### **Management Process:**

A complete fleet of device management by experience techs and single vendor management throughout device lifecycle

### **BENEFITS FOR YOUR EMPLOYEES**

#### **Employee Device Choice:**

A range of user-centric products for employees to choose from

#### **End-user Support and**

#### **Extensive Knowledge Base:**

Apple knowledge base with articles, library, and complete end-user support

#### **Intuitive Adoption:**

Apple devices bring familiarity to workplace devices, easing the transition to new and updated devices

Device as a Service with Apple from CompuCom offers enhanced productivity through the legendary Apple interface and interoperability with unlimited access to devices including—MacBook®, MacBook Pro®, iMac®, iPad®, and iPhone®—and support from our dedicated team of experienced Apple techs.

# Apple is on the table, here's what CompuCom can bring with it...

Making Your Device Management Easy

## Apple in Business with CompuCom

Simplify your technology with Apple. Modernize your approach as well as your organization's devices, and you can begin with including devices your employees want like the MacBook Pro and iPad Pro. As a single-source provider, we like to make it easy. That's because the simple approach can be the best approach for your organization. Our Device as a Service solution covers the end-to-end product lifecycle: procurement, configuration, repairs, and disposal. We do it all so you don't have to.

DaaS with Apple is cost-effective and budget friendly. By moving device purchases from capital expenditures to operational expenditures, you get greater visibility into your IT budget. The total cost of ownership of Mac is the same, or less expensive, than competitive PCs. With endless applications, great visibility and security into your infrastructure and devices, and phenomenal products to choose from, our relationship with Apple is a wise investment for your business.

## FEATURES

Procurement and hardware asset management

Consulting, procurement/order management, and provisioning of Apple devices that are right for your business under a 24, 36, or 48-month term

Forecasting and reporting for complete asset utilization staging, configuration, deployment, and break/fix support

Easy setup and configuration, kitting, zero-touch deployment process using Apple Business Manager

Advanced exchange, warranty repair end-of-life disposition, and end-user support

Guidance on asset retirement and secure disposal services
