WOMEN IN TECH
Q&A

Ana Espadas
Enterprise Architect

What does a 'day in the life' look like in your role?
Understanding the needsfor running the business and thinking about the future from the technology perspective. Identify problems and propose solutions. Align technology solutions across teams.

What top skills do you believe are needed to thrive in a career in technology?
1. Be a thinker and doer in one person
2. Adapt to change
3. Self-learning

What advice would you give to young professionals starting in tech?
1. Accept challenge! Embrace the idea of doing things even though you feel a little not ready to.
2. Character: Do not give up!

Imposter syndrome is very common for young professionals, often doubting their abilities and shying away from accomplishments. If a young woman asked you, "How do I know that I'm good enough to sit at the table?" what would you tell her?
I would say, "If you are there, it is because you earned it just the same as the other people around you. Each person's perspective is an invaluable source, so do not forget to speak up."

What traits do you need to be a great leader?
Listen, empower, and recognize the team players.

IF YOU ARE THERE, IT IS BECAUSE YOU EARNED IT JUST THE SAME AS THE OTHER PEOPLE AROUND YOU. EACH PERSON'S PERSPECTIVE IS AN INVALUABLE SOURCE, SO DO NOT FORGET TO SPEAK UP.
