

Testimonials

What Did You Find Most Valuable In The Professional Learning Workshop?

The discussion within our school clusters was extremely valuable as an opportunity to collaborate and learn from each other. The ability to confer with the PL consultant even via Zoom to be able to check our progress in developing our action plan.

Collaboration with my team to make the learning fit our small school setting.

Revision of previous content and a number of strategies/tools that I can implement with my students to assist them in receiving and giving feedback.

Remembering the importance of using the term learner rather than student. Plus to see learning through the learners eyes, so that they can see themselves as their own teacher. The dispositions of a learner are also worth teaching as skills/values that help use become visible learners.

The section on providing challenge and how that helps to establish differentiated learning goals.
The importance of timely feedback - formative over summative. Just in time and just for me

Taking concepts from previous workshops and this semester's practice and having the chance to extend these. The practical application and tools that could be used in my classroom was helpful.

Opportunity to engage in focused conversations with colleagues about shared ideas of visible learners in our school context. Discussion of common language about learners.

The Professional Learning Consultant was amazing and taking our current knowledge and building on it, giving practical ways of implementing them. I was really unclear on the metacognitive strategies and was delighted to 'see' these. The consultant was so helpful and approachable and nothing was too hard. Today was a great day for reinvigorating us and refocus us on our VL journey.
