## First-Time Offer (FTO) Worksheet

## The Ideal Sales Conversation Requires an Effective First-Time Offer (FTO)

## Can I give you money to solve this problem for me?

That probably seems unattainable.
But in fact it's possible.
Even more, we can architect this conversation.

You can create this moment by building an effective Customer Value Journey. Part of the customer value journey is an First-Time Offer (FTO).

An FTO:

- Is an irresistable offer
- Is an impulse purchase (not budgetary!)
- Is quickly delivered
- Is quickly consumed
- Delivers a disproportionate amount of value relative to the price paid
- Naturally leads to purchasing your core offer

This worksheet will help you develop your FTO. Please complete steps 1-3.
NOTE: Please don't do page 4. We'll work on that together.

## Step 1: List your available resources that you can apply to a low-dollar

 FTO Product or serviceMaterial

Staff

Other

## Step 2: List products / services you're 100\% positive you can nail

Have you sold this 100\% sure you can before?

*Who does it help? - Give specific industry and job title
** How does it help them? - Answer in 1 sentance

## Step 3: Splinter the above product / services into the smallest consumable chunks that still deliver value.

Make it solve 1 specific problem (not a myriad of problems)

Leaves some Time to deliver to
Time investment
problems unsolved customer (days) by customer (hrs)

## Step 4: Score your potiential FTOs

FTO
Price
Speed of delivery
(days)

Speed of Consumption (days)
