

## Data Privacy and Two Factor Authentication

With the growing prevalence of biometrics in access control solutions, loss of data privacy has become a greater risk. Princeton Identity (PI) offers Biometrics on Card which solves the data privacy concerns by allowing users to retain control of their biometrics. The solution eliminates storage of any biometrics within your infrastructure. While in the user's possession, biometrics are locked into the card and are impervious to network attacks and vulnerabilities..

PI's biometric readers are a drop in addition to your existing physical security with monitoring and management through PI's legendary IdentityServer. Simplified enrollment is handled through a web-browser that can integrate your existing Physical Access Control.

Biometrics on Card natively provide the additional security of Two Factor Authentication. Biometrics on Card will only identify users when their card is scanned and their biometrics are matched.

- Biometrics stored on card with full encryption
- Biometrics are never stored outside of the card and are never transmitted across a network
- Enrollment done directly at the biometric reader
- Contactless enrollment and identification
- Uses industry leading biometric Iris and Face biometric matching
- Integrates with external elevated temperature detection
- Operates with or without a network connection

# Specifications

Compatible PACS for automated syncing	Software House : C-Cure 9000 Feenics : Keep Honeywell: Pro-Watch LenelS2 : OnGuard LenelS2 : S2 Netbox Genetec : Security Center Galaxy : System Galaxy
Supported PACS connection type	Wiegand OSDP
Card storage requirements	6KB
Biometrics Stored	Face Iris
Support for Card Writing	Yes (no external card writer required)

Princeton Identity is the identity management company powered by biometrics, making security more convenient, accurate, and reliable than ever before. Using iris recognition and other technology, Princeton Identity enables businesses, global organizations, and borders to simplify identity management, resulting in improved safety and protection. Formerly a division within SRI International, Princeton Identity spun out as an independent venture in August 2016.
