## Fast, Convenient, Simple, Secure

Visitor Information System (VIS) is an operator-free visitor management system that is hosted in the cloud. Visitors are invited to register in advance and complete their final enrollment when they arrive.

Paired with an Identity Server (IDS) the system will automatically enroll biometrics for first time site visitors.

Define custom workflows and rules before arrival and in the lobby. Workflows can capture approval to use biometrics in compliance with local regulations as well as automatically expunging those records. Keep separate workflows and retention policies for infrequent versus regular visitors.

Ensure employee and visitor safety with pre-visit health screening questionnaires and fever detection & face mask enforcement in the lobby.

Registration & Scheduling

Physical Access Control

- Easy integration with your existing security system with direct integration to leading PACS
- No need to remove PPI (masks or goggles)
- Online pre-registration
- Handles consent forms and NDAs
- Automated instructional e-mails to visitors
- QR Codes for first time check-in
- Configurable visitor information retention policies
- Hands-free operation with nothing to touch
- Prevent access when fever is detected
- LED green/red for no fever/fever detected
- Configurable face mask enforcement

Specifications

System Requirements	Chrome (68 of later) Edge Chromium
Supported PACS	Software House : C-Cure 9000 Feenics : Keep LenelS2 : OnGuard LenelS2 : S2 Netbox Genetec : Security Center
Supported end devices	IOS (iPhone and iPad) v11 or later Android v6 or later ChromeOS v87 or later Windows 10 v1803 or later
Supported Email Platforms	Office 365 Google G-Suite Microsoft Exchange
Biometric Requirements	Princeton Identity IDS Access200 IOM reader Access500 IOM enrollment device

Princeton Identity is the identity management company powered by biometrics, making security more convenient, accurate, and reliable than ever before. Using iris recognition and other technology, Princeton Identity enables businesses, global organizations, and borders to simplify identity management, resulting in improved safety and protection. Formerly a division within SRI International, Princeton Identity spun out as an independent venture in August 2016.
