SASHA AND ROBERT MOVED INTO THEIR NEW PROPERTY ONCE THEY HEARD AN ADDITION TO THE FAMILY WAS ON THE WAY.

They quickly set about designing their new house to become a home for years to come, and an important part of that was a new kitchen – the centrepiece of the household. During the design phase, their primary focus was on style and convenience, which was why the choice to include an EverydaySafe made perfect sense.

### SHIELDED

Faraday functionality that protects against keyless car theft (relay attacks) and contactless credit card fraud.

### CONCEALED

Designed to be built into a range of furniture options, the EverydaySafe™ is hidden to everyone but you and selected users that you authorise.

### FAST ACCESS

Open your safe in a few seconds via the fingerprint scanner or smartphone app, allowing you to deposit or retrieve your valuables quickly and safely.

“Always knowing where to leave my keys and purse, not worrying about my car on the driveway, and having the peace of mind that my grandmother's jewellery is safe and sound – everything has added convenience and peace of mind.”

// Sasha & Robert

## 6 quick facts

- Built to an EN 14450 – S1 standard. **Construction tested and certified** by ECB-S approved Istituto Giordano. Granted SS 304 Domestic Safe Sold Secure Silver.
