

## OxBlue Increases Its Arsenal of Mobile Apps with a New App for Android Devices

ATLANTA, April 28, 2014 – OxBlue, a leader and innovator in the construction camera industry, has launched an application for clients who use Android smartphones and tablets. This new app joins the company's already existing iPhone app and mobile site to expand access to a greater number of their construction camera users who are often on the move and not at their computers.

The OxBlue Android application puts 24/7 access to all of a user's jobsites right in the palm of his hand anywhere in the world there is cellular service or wireless Internet.

**“These time-lapse movies enable users to get – and convey to others – a valuable perspective on how a project is progressing.”**

Bryan Mattern, OxBlue's Chief Technology Officer

Specifically, the new app enables users of Android devices to do the same things they can do with their laptop or desktop computer:

- View both their active and completed projects through high-resolution camera images
- Browse any of their jobsites through the OxBlue construction webcam's pan and zoom features
- Selectively view individual images at any time during the project using the interface's calendar
- Share jobsite photos via email

Perhaps the most amazing thing the new app allows Android users to do is view high-definition time-lapse construction movies of any of their jobsites using their devices. These movies are always up to date, thanks to OxBlue's time-lapse algorithm.

Every OxBlue construction camera comes with all required camera hardware, cellular data connections, image hosting, software and professional time-lapse production expertise in one complete package.

Every OxBlue construction camera comes with a professionally produced time-lapse movie of a completed project – a powerful public relations tool, also suitable for use as a project archival record.

For more information on OxBlue construction cameras and construction time-lapse movies, please call OxBlue at (888) 849-2583.

The new Android app joins the company's already existing iPhone app and mobile site to expand access to a great number of their construction camera users who are often on the move and not at their computers.

**About OxBlue:** OxBlue is a leading construction webcam service provider, with hardware, connectivity and expertise across 6 continents and all 50 states. OxBlue's construction camera services connect stakeholders on and off the jobsite, by improving communication through high-resolution imaging and time-lapse videos. OxBlue serves clients in a variety of industries including numerous Fortune 500 companies and more than 100 of ENR's Top 400 Contractors.
