

# OXBLUE PARTNERS WITH PLANGRID

## TO LAUNCH NEW PROJECT SOFTWARE INTEGRATION

OxBlue clients can simplify their processes with new integration that uploads job site images into PlanGrid's construction productivity software.

OxBlue, a pioneer in job site camera technology, launched a new software integration with leading construction productivity software company PlanGrid to streamline construction teams' process by improving access to their job site photography and data.

Prior to the integration, construction teams constantly needed to switch between the PlanGrid and OxBlue platforms. Integration of these two systems saves teams valuable time in their daily tasks by storing relevant construction information within PlanGrid and organizing all files in a central location, including photos, specs, drawings, and documents. Now, PlanGrid users can easily access OxBlue imagery in the field and reference those images while collaborating on drawings, RFIs, and field reports. Side-by-side comparison of data and images allow users to monitor their projects more closely and observe activity on site.

*“BY PARTNERING WITH PLANGRID, ALL THE JOB SITE DATA IS ACCESSIBLE IN ONE PLACE, WHICH STREAMLINES CLIENTS' PROCESSES AND INCREASES OVERALL EFFICIENCY FOR TEAMS ON ANY GIVEN PROJECT.”*

*– CHANDLER MCCORMACK, OXBLUE CEO*

With the OxBlue and PlanGrid integration, users can also easily confirm project progress and stay on schedule by comparing photography against critical milestone dates. Individuals can log into OxBlue and directly upload time-lapse images into the PlanGrid platform for everyone on a project to use.

“We are proud to offer this integration to our clients and look forward to future collaboration with PlanGrid,” said Chandler McCormack, CEO of OxBlue.

“We welcome OxBlue to our growing ecosystem of integrated partners,” said James Cook, head of strategic alliances and partnerships at PlanGrid. “Adding OxBlue’s imagery to PlanGrid gives our customers another powerful way to enhance how they collaborate on projects.”

*OxBlue is a leading construction time-lapse camera service provider, serving clients globally since 2001. OxBlue's high-resolution images, high-definition time-lapse videos, and intuitive technologies connect everyone to the job site, as well as make it easy to monitor, document, and market your project. OxBlue emphasizes client services and continuous improvement, as well as holds multiple awards for technology, innovation, and workplace culture.*
