Delinea

Privileged Access Management at Enterprise Scale

Discover, secure, manage, monitor, and audit privileged account access across your organization

As cyberthreats increase in volume and sophistication, effective and agile Privileged Access Management (PAM) is mission-critical for organizations of every size. You can adopt an aggressive privileged account security posture with Secret Server, our enterprise-grade vault available both on premise and in the cloud on the Delinea Platform. Empower your security and IT ops teams to secure and manage all types of privileged accounts quickly and easily.

✅ Protect privileged credentials

- Vaulting secures passwords, secrets, keys, and certificates across your enterprise.

- Proactive protection includes automated password creation, rotation, and expiration.

- Intelligent workflow includes checkout, privileged access request, justification requirements, and tiered approval.

- Secure highly privileged accounts with quantum-safe encryption

✅ Reduce your attack surface

- Discovery finds unmanaged privileged accounts across your enterprise.

- Rotation keeps credentials fresh without breaking dependencies.

- DevOps workflow extends PAM protection to development and operations teams.

✅ Control privileged access

- Granular policy control applies to all types of privileged identities.

- Custom script support lets you configure dependencies and integrations on your own terms.

✅ Detect suspicious activity

- Real-time session management includes monitoring, proxying, session recording, and keystroke logging.

- Integrations with SIEM and vulnerability scanners provide visibility for incident response.

- Integration with behavioral analysis leverages machine learning to identify abnormal user behavior.

✅ Audit and report

- Immutable audit log demonstrates compliance with best practice and regulatory frameworks.

- Detailed, searchable logs of privileged activities assist with forensic review.

✅ Get started fast

- Wizard-based configuration and deployment steps are easy to follow.

- APIs and accessible scripts let you adapt Secret Server to match your needs.

- Readily customizable means no need to spend extra time or money.

Secret Server Benefits

DECREASE RISK
Protect privileged accounts to tighten your attack surface

UNBURDEN IT TEAMS
Control shared credentials easily with an intuitive interface and streamlined design

MEET COMPLIANCE MANDATES
Avoid significant financial penalties

SCALE YOUR PAM PROGRAM
Deploy elastically within Delinea's enterprise-secure architecture

REALIZE FAST ROI
Configure rapidly with wizard-driven setup and configuration

DELINEA PLATFORM CONNECTIVITY
Leverage expanding capabilities seamlessly as your PAM security needs grow

PAM controls protect access to critical systems

IT operations and security teams manage Secret Server with comprehensive, policy-based controls, without the complexity or management burden of legacy PAM solutions. Secret Server makes powerful PAM easy.
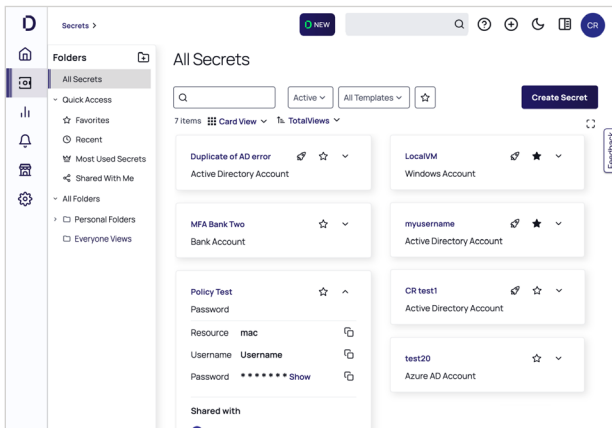

✅ Seamless access

We believe complex security tools are downright dangerous because they don't get used. That's why we designed Secret Server with an intuitive user interface and controls that integrate seamlessly with workflow systems people use every day.

✅ Seamless Integration

Secret Sever Cloud is the core of the Delinea Platform to ensure every environment can grow seamlessly while improving your privileged account security posture.

AN EDITION FOR EVERY TYPE OF ORGANIZATION, AVAILABLE ON-PREMISE OR IN THE CLOUD-NATIVE DELINEA PLATFORM

The flexibility and agility to scale PAM security controls on your own terms

Ease of use

Eliminating complexity and improved control create usable, secure tools, so you do not need to sacrifice convenience for security.

Seamless deployment

Full visibility and flexibility allows organizations to deploy Secret Server without the need for Professional Services to get up and running quickly.

Fully Integrated

Secret Server in the Delinea Platform offers the ability to leverage expanding capabilities seamlessly as your PAM security needs grow.

Delinea

Delinea is a pioneer in securing identities through centralized authorization, making organizations more secure by seamlessly governing their interactions across modern enterprise. It applies context and intelligence throughout the identity lifecycle, across cloud and traditional infrastructure, data, and SaaS applications to eliminate identity-related threats. Delinea uniquely provides intelligent authorization for all identities, allowing precise user identification, appropriate access assignment, interaction monitoring, and swift response to irregularities. The Delinea Platform accelerates adoption and boosts productivity, deploying in weeks, not months, requiring just 10% of the resources compared to competitors.
