

Discover and Protect Privileged Accounts

Stop credential misuse, not company productivity, with a modern enterprise-grade vault.

As cyber threats increase in volume and sophistication, effective and agile Privileged Access Management (PAM) is mission-critical for organizations of every size. Adopt an aggressive privileged account security posture with Secret Server available for on-premise, cloud and hybrid environments. Delinea' Secret Server enables IT and security leaders to discover and secure privileged accounts to prevent unauthorized access with streamlined management and ensures compliance by reducing risk to critical assets.

Continuous Discovery

- Quickly identify service, application, administrator, and root accounts across your environment.
- Discover and secure cloud accounts across your cloud landscape.
- Seamlessly secure the credentials in an enterprise-grade vault.

Automation

- Automate the lifecycle of credentials to critical accounts.
- Seamlessly automate password rotation, and set granular controls.
- Consistently apply policies to reduce the risk of credential theft and ensure compliance.

Session Monitoring

- Monitor and record privileged session activity.
- Ensure visibility into user activities to identify suspicious behavior.
- Document all activity with a full audit trail.

Centralized administration

- Unify the security and management of privileged credentials to increase visibility across all users.
- Reduce administrative overhead, streamline policies and free up IT resources for other critical initiatives.

Secret Server Benefits

DECREASE RISK

Protect privileged accounts to tighten your attack surface

IMPROVE ROI

Deploy and implement in weeks, not months

EXCEED COMPLIANCE

Real-time insights and reporting streamline proof of compliance

INCREASE PRODUCTIVITY

Automation simplifies the management of business-critical privileged assets

SCALABLE PAM

Adaptive controls ensure secure access as your needs evolve

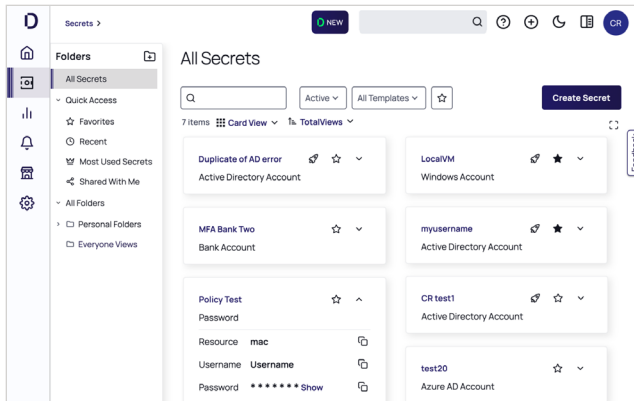

DELINEA PLATFORM CONNECTIVITY

Secret Server on the cloud-native Delinea Platform offers 99.99% guaranteed uptime

Protect and monitor access to critical systems

Secret Server removes the complexity for IT operations and security teams, enabling them to discover, secure, manage, monitor, and audit privileged accounts efficiently. Secret Server is feature-rich, secure, and easy to use and adopt, making it an essential tool for modern IT security teams and foundational to your PAM strategy.

✔ Seamless and Secure Access

Complex and cumbersome security tools are downright dangerous because they don't get used. That's why Secret Server is designed with an intuitive user interface and controls that integrate seamlessly with workflow systems people use every day.

✔ Streamlined Management

Secret Server integrated with the cloud-native Delinea Platform enables seamless security with analytics-based access controls and adaptive privilege automation across your IT infrastructure ensuring the right identity has the right access with the right permissions at the right time.

DEPLOYMENT OPTIONS TO FIT EVERY TYPE OF ORGANIZATION AND AVAILABLE FOR ON-PREMISE, CLOUD AND HYBRID ENVIRONMENTS

The flexibility and agility to scale privileged account security controls on your own terms

Easy to use and scalable

Improved controls enable usable, secure tools, so you do not need to sacrifice efficiency and productivity for security.

Seamless deployment at any level

Full visibility and flexibility enables organizations to deploy Secret Server quickly with less overhead needed to manage showing the quickest time to value.

Fully Integrated with Delinea Platform

Secret Server in the cloud-native Delinea Platform offers 99.99% uptime and access to expanding capabilities seamlessly as your identity security needs grow.

Delinea

Delinea is a pioneer in securing identities through centralized authorization, making organizations more secure by seamlessly governing their interactions across modern enterprise. It applies context and intelligence throughout the identity lifecycle, across cloud and traditional infrastructure, data, and SaaS applications to eliminate identity-related threats. Delinea uniquely provides intelligent authorization for all identities, allowing precise user identification, appropriate access assignment, interaction monitoring, and swift response to irregularities. The Delinea Platform accelerates adoption and boosts productivity, deploying in weeks, not months, requiring just 10% of the resources compared to competitors.
