

Delinea Security Academy: Certification Program

Delinea's professional certifications are designed to validate deep product competence through knowledge tests and real-world, hands-on technical challenges. The goal of Delinea's certification program is to enable and train key technical personnel and empower them with the ability to effectively and productively own Delinea applications. Delinea's certification program encompasses a diverse range of topics including product-specific terminology, architecture, installation for on-premise options, cloud-specific configurations, common use cases, security hardening, best practices and disaster recovery.

Delinea's certification program offers options for achieving both "book smarts" with a self-paced, all online exam and the option to demonstrate proven ability with advanced, hands-on practical challenges that require extensive expertise on Delinea's product portfolio. Delinea's certifications are appropriate for both customers and partners to validate technical knowledge and expertise.

Certification Options

Secret Server

- Secret Server Associate
- Secret Server Engineer
- Secret Server Consultant (for partners and invite only)

Privilege Manager

- Privilege Manager Associate
- Privilege Manager Engineer

Delinea's Associate Certification level is designed for self-paced, online only enablement. Using adult learning best practices and bite-sized training videos, Delinea's Associate certification includes a list of product specific training videos and short quizzes. To become a fully Certified Associate, a student must also pass a 100-question online exam. The exam is open book/open note and students can leverage all available resources however the exam is never the same with questions that rotate to ensure a unique experience for each attempt.

- Self-paced online coursework and exam
- Validate technical knowledge for use cases, best practices, and security hardening
- Learn product-specific terminology and concepts

Delinea's Engineer Certification is designed to validate technical product ability through hands-on challenges and official verifications. Using technical hands-on lab challenges forces students to prove their capabilities and demonstrate they can successfully install and configure Delinea's product portfolio. Each challenge is designed to cover a wide variety of topics including architecture, installation, configuration, security best practices, troubleshooting, and common product use cases. For validation and verification, to become a fully Certified Engineer, students must demonstrate and document success with sign-off from an official Delinea Security Academy Expert.

- Validate technical ability to install and configure to security best practices
- Hands-on, technical lab challenges
- Demonstrate success and product expertise

Delinea's Secret Server Consultant certification is the highest level of enablement and is for partners by invitation only. Secret Server's Consultant certification includes self-paced, online coursework, an online exam, and a hands-on technical lab challenge. At this level of certification more advanced topics and skillsets are required including experience with architecture, scripting, and APIs. The diverse topics in the online exam and technical, hands-on lab challenge include multi-site architecture, sizing, advanced DR/HA options, customizations, extensibility, and integrations. Similar to other Delinea certifications, students must demonstrate and document lab successes with validation and verifications from an official Delinea Security Academy Expert.

- Self-paced online coursework and exam
- Hands-on, technical lab challenge
- Validate technical ability to extend, customize and integrate
- Demonstrate success and product expertise
