

Prioritize the next-best claim to work, automatically, so you can increase cashflow and **team productivity**

How we help

Take the burden, the **cherry-picking** and the guesswork out of prioritizing the next best claim to work so your team and business can grow. With e5 RCM Priority Processing, you will confidently work claims in the order that drives the most value for your organization.

The value

Clearly identify the highest value claims based on your organization's financial priorities

Visibility of data in a different way so you can do more for your organization

Software manages priorities so your leaders can optimize your business

Free up resources so your team can do their best work

Improve your team's productivity, no matter where they are located

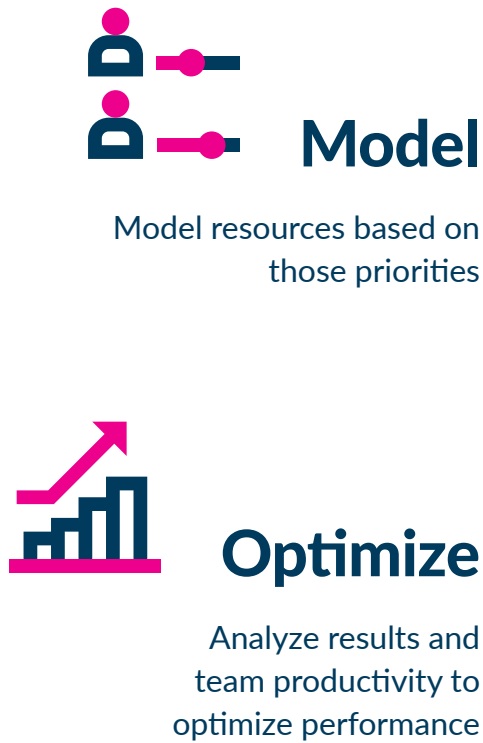

Eliminate timely filing issues

How it works

Where priority processing improves outcomes for **billing teams**

-  Volume heavy work
-  Rejections
-  Multi-step processes
-  Aging AR
-  Prior authorization
-  Small dollar balances
-  Timely filing
-  Refunds management
-  Appeals
-  Team skillset prioritization
-  Denials – pre and post-bill
-  Front-end / back-end process prioritization
-  Productivity prioritization
-  Revenue cycle items requiring human touch

Included **toolset**

Intelligent work distribution

Automatically assigns work based on your organization's priorities and the skill set of available team members. This transfers the burden of determining the next best claim to file from the manager to the software.

Analytics, automated insights, dashboards and reporting

Utilize business intelligence in a different way. Helping you see the data based on your organization's requirements and the payer's requirements, including timely filing.

System connection

Use e5 as a stand-alone, or utilize a simple integration framework created to connect to your systems with a light IT footprint.

Document capture, conversion & indexing

Connect to your document management system, or utilize e5's already embedded document management ecosystem. This allows you to seamlessly work and interact with the documentation you need from multiple sources.

Team priority modeling

Helping you group and manage the skillsets of your billing team based on your organization's business goals.
