

Release Notes for Q1 2021

CONFIDENTIAL ©2021 Certiverse

2021 - Q1

Certiverse Account and Multi-Factor Authentication

In addition to using your LinkedIn credentials to log into Certiverse, you can now create a Certiverse account using the email address of your choice. The Certiverse account requires email verification and multi factor authentication, which ensures your data is secure.

Certiverse Reporting Portal

The Certiverse Reporting Portal is where users go to run reports. In addition to the existing *Delivery Activity Report*, the Certiverse Reporting Portal includes three new reports: Candidate Results Report; and Results Analysis Report; and Survey Data Report.

JTA Survey Customization

Enhancements to allow customers to customize the standard JTA Survey, including: Exclude demographic and background questions; Set custom dimensions; Adjust dimension weights; Modify automated analysis and UX to honor custom dimensions and weights.

CONFIDENTIAL

Form Preview & Quality Assurance Mode

Supports delivery of forms in quality assurance mode, pre-publication. Allows testing of look and feel, scoring, etc.

Form Scoring

Initial implementation of aggregate scoring at section and form levels. Supports raw score, score tables (for scaling/equating), percentage, and Pass/Fail determination.

Live Exam Delivery

Features to support delivery of live exams including assigning items to forms, sending exam results to client, and delivery session management.

Beta Form Rescore

Support for rescore of beta forms against multiple live forms.

Certiverse/PSI Delivery Integration for Live Exams

Integration with PSI to support delivery of Certiverse exams under PSI proctoring services as well as automation of sending result data to clients.
