

# Easy-to-Use Biological and Chemical Fungicide

AZterknot® is the industry's first three-way fungicide that combines the benefits of a biological with the performance of chemistry and the ease of Allosperse®.

## THE AZTERKNOT DIFFERENCE

- Delivers systemic, broad-spectrum, preventative control of key diseases.
- Induces the plant's natural defenses to improve plant health and increase stress tolerance.
- Improves quality and yield.
- Contains two powerful modes of action: Group 11 and Group P5 for smart resistance management.
- Mixes well with liquid fertilizers, hard water and other crop inputs, even in low volume solutions.

Delivering ground-breaking disease control, AZterknot promotes better plant health and greater ROI.

<b>CATEGORY</b>	Fungicide + Plant Health
<b>CONTAINS</b>	Azoxystrobin + <i>Reynoutria sachalinensis extract</i> + Allosperse
<b>GROUP</b>	11 + P5
<b>APPLICATION</b>	Soil or foliar
<b>COMPARE TO</b>	Unique
<b>PACKAGE SIZE</b>	2 x 2.5 gal

## KEY DISEASES CONTROLLED

Alternaria leaf spot	Pythium
Anthracnose	Rhizoctonia root rot
Black dot	Rhizoctonia stalk rot
Black scurf	Rusts
Downy mildew	Sheath blight
Early blight	Silver scurf
Gray leaf spot	
Northern corn leaf blight	
Powdery mildew	

## PRECISION CHEMISTRY FOR REAL RESULTS

Vive products contain the Allosperse® Delivery System, a unique proprietary technology that changes how proven active ingredients behave in the spray tank.

Using patented nano-polymer shuttles, Allosperse carries the active ingredient where it needs to go.

Allosperse targets and optimizes the interaction between active ingredients, fertilizers, micronutrients, biologicals, and other chemicals to ensure product compatibility and performance is at its very best.

## HERE'S WHAT CUSTOMERS ARE SAYING

"The alfalfa field that was applied with AZterknot came back with the highest test value compared to my other fields."

**Jim Fagan**  
Iowa alfalfa grower

"I applied AZterknot with a combination of other things in the tank mix and came out flawlessly. I'm very impressed with the health of my alfalfa after spraying it with AZterknot. I would recommend it to my neighbors."

**Jerry Tlach**  
Iowa alfalfa grower

"AZterknot-treated potatoes were greener and stayed healthier (less disease and leaf roll) late in the season."

**Todd Searle**  
Idaho potato grower

"It stands to reason that some synergies could develop from the combination of azoxystrobin and reynoutria extract. We applied AZterknot aerially in potatoes with an insecticide. We saw less early blight and noticed less soft rot than normal."

**Joe Hill**  
Oregon crop consultant
