

FM 320 PLUS P SERIES IR CAMERA

The FM 320 Plus P Series IR Camera is an infrared skin temperature measurement system with the ability to report the total number of persons scanned as well as alarm events. With a 384 x 288 pixel resolution, the FM 320 Plus P features high accuracy and an AI algorithm to measure across large areas. This makes the system perfect for non-contact temperature measurement and radiometric imaging in public areas. Elevated skin temperatures trigger an alarm sound and image capture features for ease of use.
