

ICI's Temperature Reference Source U has been developed for high-precision infrared body temperature measurements. Our device features a 100 mm x 80 mm (3.94" x 3.15") isothermal target specially designed to measure between 5 °C to 50 °C (41 °F to 122 °F). It is highly accurate making it a perfect temperature reference for calibrating non-contact thermometers and cameras as well as devices for associated applications. Our instruments include a calibration certificate that is traceable via international agreement to all major national standard bodies, including the NIST.
