# YAYPAY BUSINESS INTELLIGENCE MODULE

Advanced AR reporting, at your fingertips.

## MASTER YOUR DATA

YayPay's advanced Business Intelligence (BI) module makes it easy for finance teams to create powerful custom reports to drive better business decisions, directly within Yaypay's intuitive interface.

Conduct a robust analysis of the data that matters most to your business and visualize your AR health in real-time with dynamic charts and graphs.

### Save time and money

No more reliance upon expensive third-party applications or time-consuming, error-prone manual data analysis. YayPay's BI module provides a customizable view of your accounts receivable information by leveraging hundreds of data elements with easy-to-use filters and presets. Non-technical users can create compelling reports in seconds, from anywhere.

### Control data accuracy

Using one platform to effectively manage and segment your AR data helps limit the risk of poor data integrity, common with finance teams who rely upon multiple databases and manual analysis for tracking and reporting.

### Make better business decisions

Build custom dashboards to view and segment AR data tailored to the unique needs of your business. This helps you make more informed decisions and focus your efforts on what matters most.

“With our previous accounting software, we always had to create our own internal reports to get what we needed to run our business. With the Business Intelligence Module, I have the ability to make YayPay my one-stop-shop for all my accounts receivable needs!”

- Stephen Tracy, Director, People and Operations, CHG Healthcare

# DIG DEEP INTO AR HEALTH WITH HUNDREDS OF UNIQUE ATTRIBUTES INCLUDING:

Disputes, communication volumes, trends and more.
