

CRANE & RIGGING TRAINING CATALOG

Bishop Lifting Products provides personalized crane and rigging training to our customers. We work with you to create custom tailored courses that cover the equipment and topics that are pertinent to you and your employees. We feel this allows you to get the most value for your time and money. Based out of our Houston, TX location, Bishop Lifting Product's training is available to all of our current and potential customers. Travel expenses outside of Houston area may apply.

If interested in one or more of the course topics, simply contact Bishop Lifting Products at 713-512-1727 and ask for our training specialist. If you have a rigging and lifting related topic, or a piece of equipment that is not specifically listed, contact us. We will work with you to create content or put you in touch with someone who can provide the training you need.

Training Class:		Description:	Includes:		
			Wallet Card	Test	Certificate
Basic Rigging and Inspection Presentation	1 Hour	Completely customizable to cover the topics that are important to you and your team. These presentations are great options for safety meetings and lunch and learns.	X		X
Basic Rigging and Inspection Seminar	2-3 Hours	Our most popular course option - enough time to cover the basics of select topics, but you don't lose a whole day of production. The class can also be offered multiple times in a day so that employees can be sent in shifts.	X		X
Qualified Basic Rigging	8 Hours	Indepth coverage of the topics covered in a 2 day Rigger 1 course. This course works especially well if there are topics or equipment in the Rigger 1 course that are not pertinent to your day-to-day activities and can be removed from the curriculum.	X	X	X
Qualified Rigger Level 1	2 days	Our Qualified Rigger Level 1 course is based on the curriculum covered in rigging certification prep courses. We provide your employees with the basic knowledge and skills to perform standard day to day rigging and lifting activities.	X	X	X
Signal Person	4-5 Hours	Basic Signal person provides students with the basic knowledge and skills to begin working as a signalperson with mobile cranes. The course includes hand signals, crane limitations, fall zone, power line safety, and control of work area. Signalperson can be added to one of our other presentations above or covered as a standalone course.	X	X	X
Overhead Crane	4-5 Hours	Our Overhead Crane Operator Course covers basic inspection, operation, and load limitations along with Basic Rigging and Inspection for "below the hook" equipment. Overhead Crane Operator can be added to one of our other presentations above or as a standalone course.	X	X	X
Forklift Operator	1/2 Day	Basic use and inspection topics for forklift operators. This course prepares students for day to day forklift operation. The course includes a hands on forklift operation test using your forklift and your facility to make sure that operators have the skills and knowledge for basic operations in your facility.	X	X	X
Fall Protection	2-3 Hours	Course covers OSHA regulations for basic fall protection including: SRLs, Lanyards, Harnesses, horizontal and vertical lifelines, ladders and scaffolds.	X	X	X
