Subject: No POP Chemicals in Swagelok Products

To Whom It May Concern,

We are providing this letter in response to customer inquiries regarding Swagelok products relative to the chemicals listed as Persistent Organic Pollutants ("POPs") under the Stockholm Convention and applicable United States laws.

Based on an internal review of the Stockholm Convention POP chemical list (May 2017) and input from suppliers, to the best of our knowledge as of the date of this letter, POPs are not present in nor intentionally added to any Swagelok product. Further, Swagelok does not use POPs in any of its manufacturing processes. A listing of the Stockholm Convention POP chemical list can be found here:

<http://chm.pops.int/TheConvention/ThePOPs/ListingofPOPs/tabid/2509/Default.aspx>

More information regarding the actions taken by the United States to reduce the emissions of POPs and to increase the regulations on and restrictions for use of POPs can be found on the Environmental Protection Agency's website at the link below:

<https://www.epa.gov/international-cooperation/persistent-organic-pollutants-global-issue-global-response>

Please contact your authorized Swagelok representative for further assistance.

Sincerely,

A handwritten signature in black ink, appearing to read "Steven J. Volcansek".
