

How we helped a company save \$500,000 in freight costs

RESULTS

- **\$500,000 saved on freight costs in under one year**
- **24/7 problem-solving with a logistics expert responding in <30 minutes**

SUMMARY

National Oak Distributors, an automotive paint, body, and equipment warehouse distributor, came to us seeking enhanced reporting tools and better supply chain visibility. We worked with the company to deliver approximately \$500,000 in freight savings.

CLIENT

National Oak Distributors, an automotive paint, body, and equipment warehouse distributor.

CHALLENGE

Ensuring fast and reliable deliveries in a complex supply chain.

APPROACH

3PL carrier management, BI dashboard.

PAIN POINTS & SOLUTIONS

INSTANT SHIPMENT TRACKING TOOLS DEVELOPED

Our client had a large number of shipments to manage across the US. With a lot of products moving, the company required greater visibility and control over its shipping and tracking.

We used IL2000's BI platform to develop a suite of customized on-time performance reporting tools. National Oak Distributors gained the data they needed to manage critical shipments, in the process supporting company sales and enhancing customer service.

CARRIER BOTTLENECKS PROACTIVELY MANAGED

National Oak Distributors had to perform their own investigation when something went wrong within the supply chain. With such a vast freight operation on its hands, resolving these issues was time-consuming and difficult.

IL2000 supported National Oak Distributors with a fully dedicated tracking team that could respond to delays and other supply chain challenges in under 30 minutes. The company saved over \$500,000 in freight costs.
