

# A Robust, Turnkey Employee Wellness Program and Lower Premiums Year After Year...

This is why we've been ERChhealth clients for 15+ years.

We want to provide free opportunities for employees to access wellness resources and encourage them to make preventive care a priority by seeing their physicians once a year. We are able to do that, and much more, through ERChhealth.

**“When individual employers provide health insurance as a standalone company, there really isn't any kind of outreach or programmatic support for overall staff well-being. ERChhealth actually comes with a package of services, applications and programmatic elements that are designed to help organizations create a culture of wellness. The reduced premium cost, robust plan design and wellness programs are major differentiators. I would highly recommend other organizations look into joining ERChhealth.”**

- ERChhealth's **credit program helps bring down renewal costs** even more - we have saved at least 3% yearly on average.
- The Be Active program encourages employees to stay active in their daily lives and **incentivizes physical activity with rewards** in the form of \$50 Amazon gift cards each month.

**The Cleveland Foundation** is a nonprofit dedicated to funding projects that enhance the lives of Northeast Ohio residents. Through grantmaking, they are able to provide opportunities for work, beautiful neighborhoods, health care, arts, culture, and more. They are instrumental in convening community leaders - bringing together corporations, health care institutions, higher education institutions, and other establishments to address a number of vital community issues.

**Company:** The Cleveland Foundation  
**Company Size:** 93 employees  
**ERChhealth Clients and ERC Members:** 15+

**Monica Brown**, Vice President,  
Human Resources, Building  
Operations & Guest Services
