

# Is Your Wired and Wireless Infrastructure Keeping Up with Digital Demands?

Providing secure and reliable access to the network used to be simple—but today's environment creates new challenges.

Users want to connect from more places than ever. IoT devices will make up 50% of global connected devices by 2023.<sup>1</sup> Data bit rates grow higher as video streaming improves. And attackers are constantly finding new ways to disrupt it all.

## The current network landscape: A complex reality

IT can spend up to 4 times longer collecting data on a network breach than it does analyzing and resolving the issue.<sup>5</sup>

## Today's network needs to be simple, automated, and secure

To bridge the gap between business operations and IT performance, build your network on four key pillars:

- A unified, scalable architecture** across wired, wireless, WAN, and data center
- End-to-end visibility** with constant learning and optimization of performance and security
- Consistent security** that is integrated into the network model
- Comprehensive automation** to scale and simplify operations

## Our networking portfolio offers assurance, automation, and security to provide the secure access you need

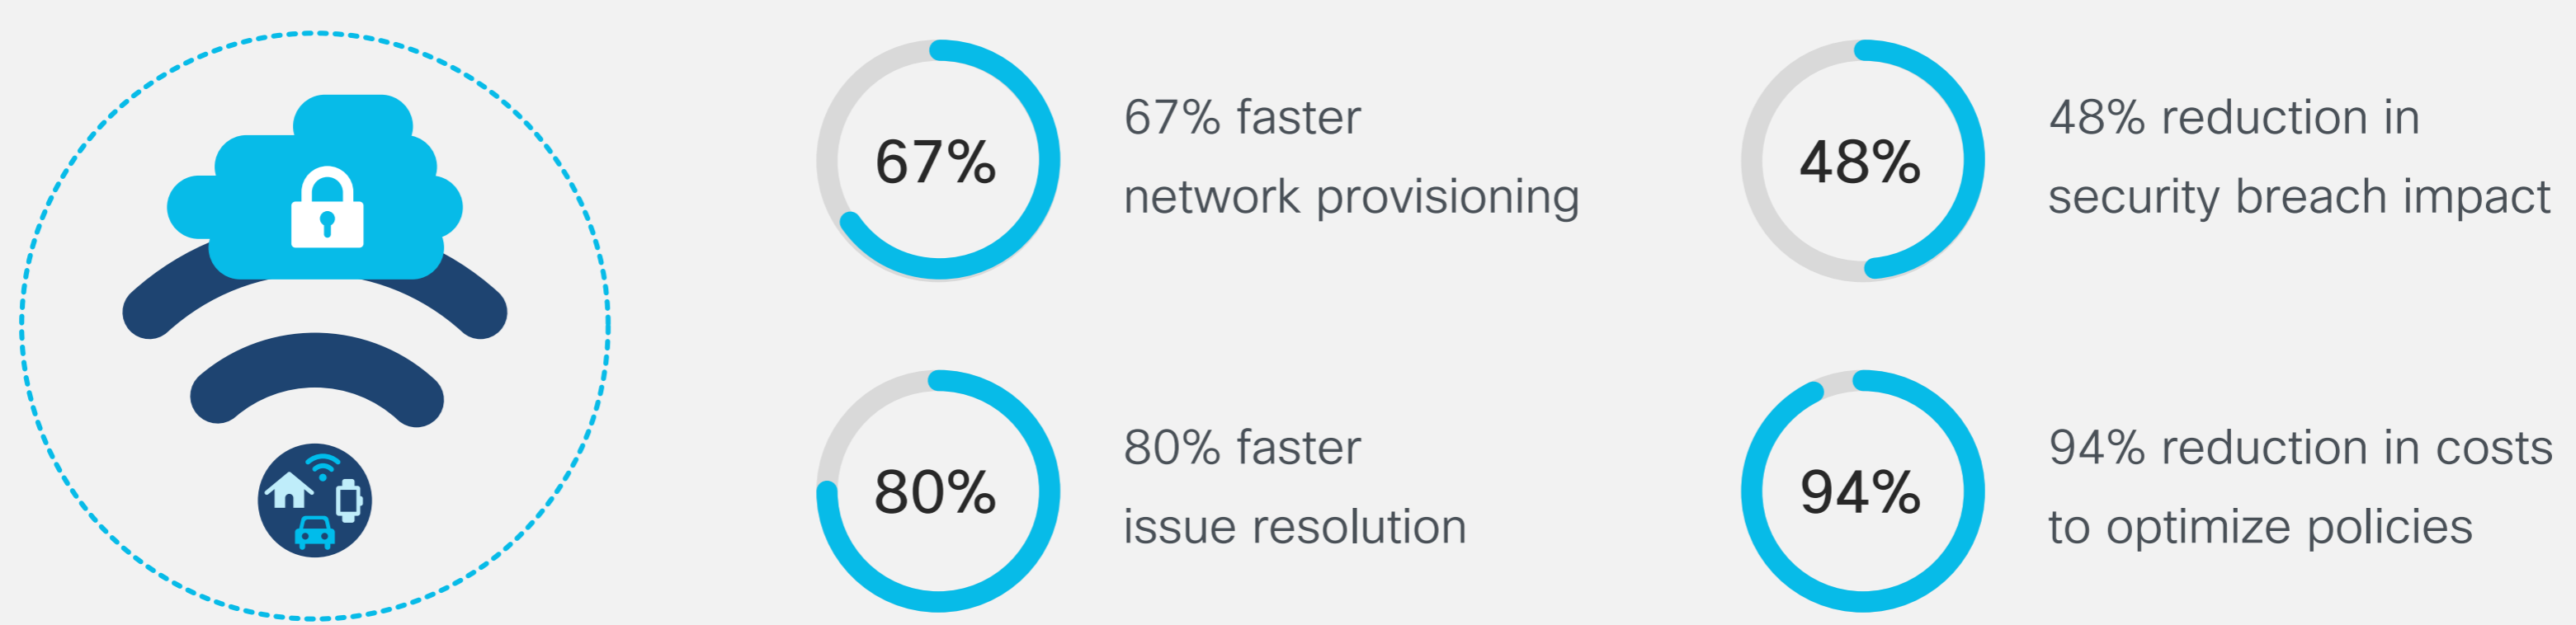

- Centralized, automated, simplified control**  
Cisco® Meraki® dashboard, Cisco DNA Center
- Network assurance**  
Cisco Meraki Insight, Cisco DNA Assurance
- Securing the network**  
Cisco Meraki Systems Manager, Cisco Identity Services Engine (ISE), Cisco Stealthwatch®
- Trust access**  
Cisco Duo, Cisco Umbrella®

**Branch**

- Fixed switching**  
Cisco Meraki MS switches, Cisco Catalyst® 9100 and 9800 Series wireless access points and controllers
- Wireless**  
Cisco Meraki MR access points, Cisco Catalyst 9100 and 9800 Series
- Seamless access anywhere**  
Cisco AnyConnect®, Cisco Next-Generation Firewall

**Devices:** Laptops, Tablets, Phones, Desktops, IoT IP CCTV, IoT, Thermostats

## Save time and money with real results from Cisco Secure Access solutions<sup>6</sup>

## Ready to deliver the secure network access that will keep your business competitive?
