

UNPARALLELED PATIENT SAFETY EDUCATION FOR CRITICAL ACCESS HOSPITALS

Every clinician deserves access to quality patient safety education, even if a lack of resources or a clinical education department in your critical access hospital have historically prevented this. The Sullivan Group's *Patient Safety Education Program for Critical Access Hospitals* allows your organization to affordably provide every credentialed clinician access to the same world-class patient safety education trusted by some of the country's largest and most prestigious health systems for over 20 years.

Our online CME/CE library of 250+ case-based courses offers unmatched depth and breadth in critical patient safety issues, as well as relevant medical-legal topics such as HIPAA and EMTALA. This best-practice education program provides maintenance-free content to leverage in the cohesive training of your clinical staff without overextending your budget.
