

Digital Walkdowns with Utopia Intelligent Mobile Capture vs Manual Field Data Collection

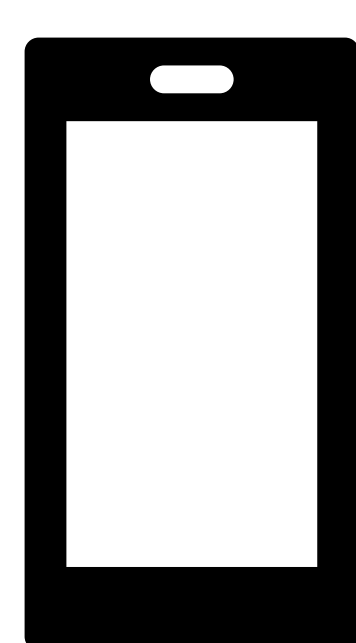

40% of your asset data is inaccurate or missing

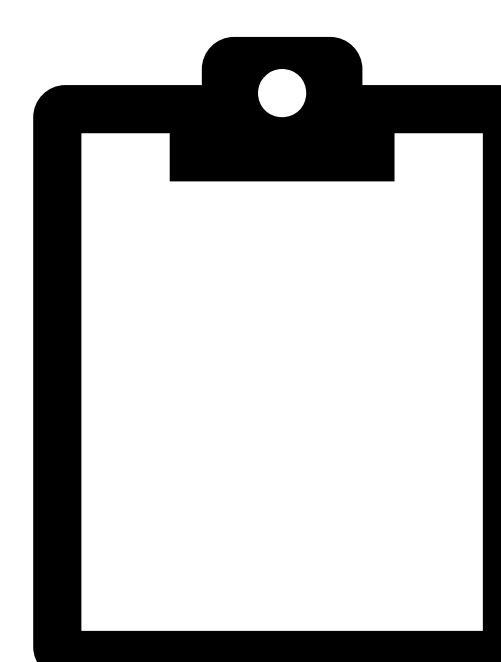

At least 40% of asset data is incomplete and inaccurate. Bad data is then shared across the business, resulting in a cascade of negative impacts.

Utopia Intelligent Mobile Capture (uIMC)

Rapidly find and fix missing asset data with point-and-click photo simplicity, powered by ORDITAL.

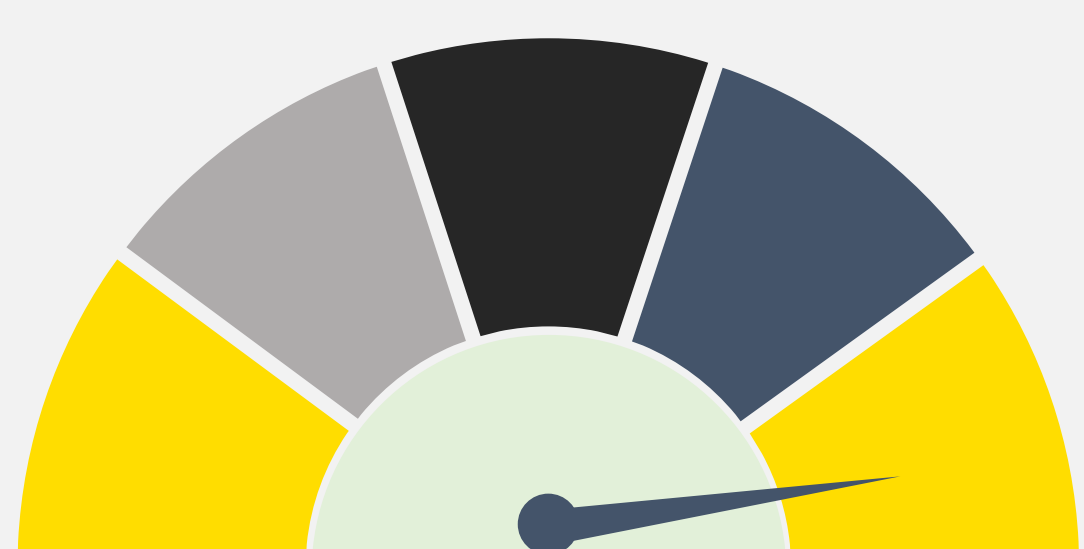

VS

Traditional Field Data Collection

Labor-intensive and costly manual walkdowns require senior employees, take over 5x longer, and are less accurate.

5x Faster

Success in the Field:

Using Utopia Intelligent Mobile Capture, a large oil and gas company was able to catalog their assets at over 100 sites in just 3 weeks.

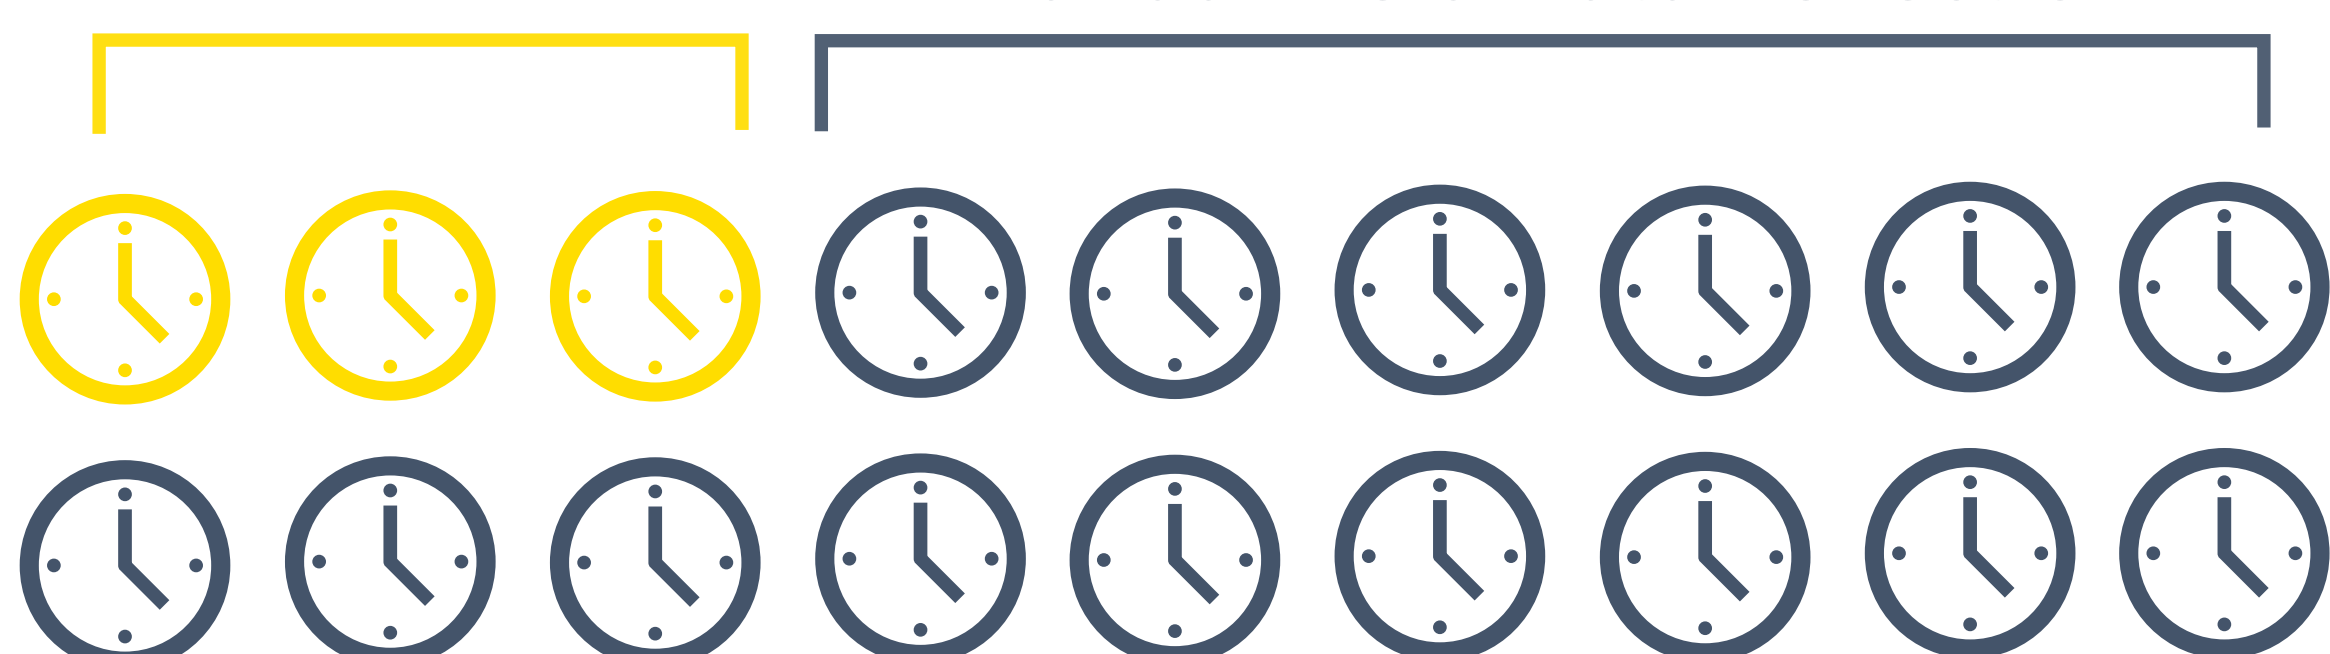

Time Spent Per Asset

3 Minutes

15 Minutes

uIMC

Manual Field Data Collection

Faster field data collection accelerates new or existing advanced operational improvement as well as maintenance and reliability initiatives like reliability centered maintenance and predictive maintenance.

Assets Captured Per Day

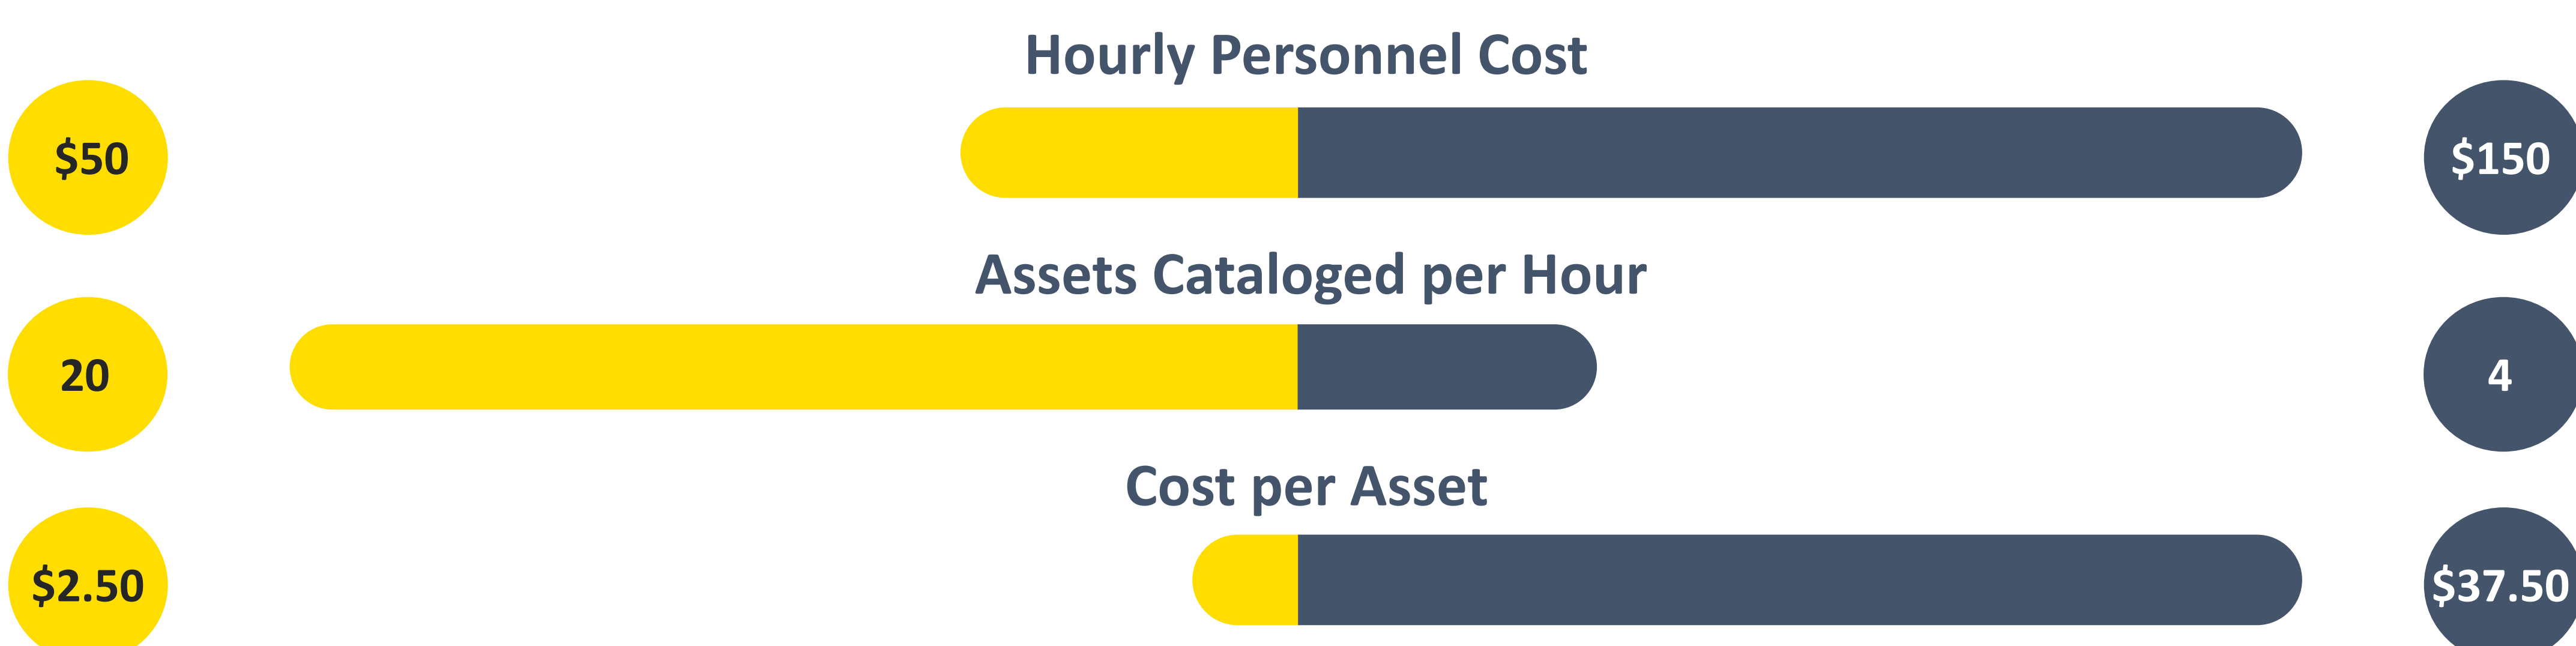

Junior employees with no specialized training can effectively catalog hundreds of assets each day, with a simple mobile photo capture and catalog app.

Major Cost Reductions

Utopia Intelligent Mobile Capture (uIMC)

Manual Field Data Collection

Asset Data Accuracy Matters!

Utopia Intelligent Mobile Capture Success Cases

- A global services company increased its walkdown capacity by 3x without increasing staff
- A large facilities management company reduced its field data collection time by over 50% allowing them to negotiate better subcontractor and supplier pricing
