

Dear Valued Customer;

Beginning April 1, 2019, the Canadian Federal Government introduced a carbon-based "Fuel Charge" program through its Greenhouse Gas Pollution Pricing Act. This program requires that a carbon fee be charged for the amount of greenhouse gas (GHG) emissions that Ontario homes and businesses emit. The amount of this carbon fee is determined by the Canadian Federal Government. The "Fuel Charge" program requires that Importers, Producers, and Distributors of propane charge the carbon fee on every litre of propane sold.

As of April 1, 2021, there will be a mandated Government levy increase. Budget Propane Corporation will be required by the Canadian Federal Government to now charge a carbon fee of **\$0.0619 cents per litre** on all propane sales effective April 1, 2021. This is an increase from the current carbon fee of \$0.0464. Going forward, this carbon fee remains subject to future changes as directed by the Canadian Federal Government.

This "Fuel Charge" amount will be indicated on your delivery invoice as a separate line item (Federal Fuel Charge) and additional to the price you pay for propane.

If you have any questions or concerns related to this program, contact Canada Revenue Agency helpline at 1-866-439-4202, or contact Budget Propane Corporation at 1-888-405-7777, and we will have a representative assist with your questions or concerns.

Regards,

James Callow, President
