

# Construction Management: Cabinet Making and Architectural Millwork

## PROGRAM DESCRIPTION

### Carpentry Degree Program

\*Pending HLC Approval

The Cabinetmaking and Architectural Millwork program at Hocking College is a two-year intensive program designed to give students a hands-on education in the design, construction, and installation of commercial and residential interior architectural woodwork.

Students will also be introduced to a variety of techniques intended to broaden the scope of their cabinetmaking knowledge, including but not limited to: turning, bending and laminating, carving, veneering/laminating and CNC technology. Throughout the program, students will gain invaluable knowledge related to entrepreneurship and business management to ensure their success as entrepreneurs and productive members of the labor force.

The Hocking College Wood Lab is equipped with state-of-the-art machinery capable of processing a raw log into a finished wooden product. It's one of a limited number of programs in the country and the only facility in the state that has the capacity to do this.

The Cabinetmaking and Architectural Millwork program responds to the growing need for individuals trained in skilled craftwork and residential/commercial construction. Opportunities for Cabinetmaking and Architectural Millwork jobs also exist for those who aspire to manage their own businesses as independent contractors.

## ALL-INCLUSIVE PRICING

Hocking College offers all-inclusive pricing and works with students to assure they have complete college funding, including financial aid, before they start classes. All-inclusive pricing includes the following:

### PER SEMESTER

\$300.....Learning Fee  
\$20.....Health Center Services  
\$75.....Career Center Services

### OPTIONAL

\$53.....Parking  
\$275.....Smart Start\*

\*Recommended for all first-year college students
