

## What is the story behind AccuPOS?

When AccuPOS began, we observed the frustration of business owners whose needs were not being met by POS systems. We asked ourselves, “What if there was a way to give every cashier in retail the same fast and familiar interface for serving customers – but also allowed every business owner to choose the ideal, preferred back end for them?” Our research soon led us to discovering the wonderfully diverse invoicing and reporting capabilities of worldwide QuickBooks and Sage products. We soon realized our idea had even more potential. Turning easily gathered Point of Sale data directly into paid accounting invoices would mean that a CPA’s work is essentially done. AccuPOS Point of Sale was born.

## Fast Facts:

- AccuPOS has been successfully implementing POS solutions for 17 years. We were established in 1999 in the US.
- We are a global company with thousands of customers.
- AccuPOS sets itself apart by being easy-to-use, speedy, and fully integrated with QuickBooks and Sage accounting software.
- Our software is locally installed creating high performance and speed. Our latest version, offers the convenience of managing the software from anywhere through a web-based client.
- We continue to develop enhancements and products to meet the needs of our customers. This year alone, we've added a loyalty program, cloud reporting, and web management.

# Unique Features

- **Accounting integration** - making accounting seamless
- **Easily add more devices and terminals** - unlimited growth
- **Local Area Network set-up** - high performance and speed, speed, speed!
- **Instant Insights** - full P&L view with line item detail
- **Powerful receipts** - build a customer database and go green by emailing your receipts
- **Fully EMV Compliant** - we are EMV ready and have been for years

## Unique Features (continued)

- What makes our POS unique is the line by line full integration with Quickbooks and Sage accounting software packages. We have also designed our POS to be a hybrid for the retail and food service industries.
- We have stayed true to our POS niche by developing new tools, features and functionality that help our existing customers grow their business while fitting new customers to our solutions
- **Security:** PA-DSS: Credit card information is not captured and stored inside the POS
- We have continuously worked as partners with Quickbooks and Sage to stay fully integrated.
- We offer a variety of add-on features (next page) to help your business wherever it is needed.

## Pricing and Contracts

- One station with full accounting integration starts at \$1295
- A bundled price includes hardware, software, and support services that cover installation, training, best practices, and technical support.
- There is no contract for the hardware and software, these are purchased and owned by the customer. A twelve month support service contract commitment is required for new businesses to ensure success is achieved utilizing the solution. We recommend the continuation of this commitment as a business partner to our customers. There are NO cancellation fees.

## We offer great Add-Ons to our software, including:

**AccuSHIFT** - Employee time clock

**Loyalty** - Smart-phone based app and sophisticated back-end CRM

**AccuCOUNT** - Inventory management

**Cloud Reporting** - Multi-location web based analytics

**Headquarters Module** - Multi-location Management

**Remote Transfer Module** - Allows you to sync with and out of network accounting package.

## Hardware and Software Requirements:

- AccuPOS will run on any Windows or Android device with 2 GB of RAM or more and running either Android 4.4 or greater, or Windows XP or higher.
- We have developed our software and it is proprietary.
- We sell hardware and software directly to our customers

## Business Size:

- We market ourselves to small to medium size businesses that want to make their accounting software the hub of their business.
- There is no limit to the number of users that can be added to our solution, and it can handle multiple locations with ease.

# Using our software / Customer Service & Technical Support

- We have a robust pathway to success here as you set-up our software. Our Customer Service and Technical Support teams work together to ensure the hardware/software installation is completed for each customer.
- AccuPOS has 24 / 7 / 365 tech support for all your needs. We also offer trainings to help you understand the features.
- Unlimited support service is included in our platinum package, along with all our upgrades
- Our Customer Service team is here to help shepherd the whole process from installation and beyond.
- We have a terrific web management tool that gives you access to manage your business from anywhere at any time.
