

Newark Warehousing

One million square feet. One mile from Port Newark.

In Newark, SalSon's location next to the port lets high-volume importers reduce transportation costs and get *products to market faster*.

- **Proximity to port** reduces dray costs and cuts cycle time – SalSon fleet of 1,200 chassis ensures dray capacity
- **Competitive storage rates** give you on-port convenience with off-port pricing
- **Large container yards**, managed by PINC yard management system, store containers until they're ready to ship
- **Food-grade facilities** are FDA-compliant and inspection-ready from day one
- **Tier One WMS system** manages any picking protocol and offers real-time Web visibility
- **Integrated solution** for dray, warehousing and final delivery – 48-hour port-to-shelf capability from a single provider
