

MICROSOFT TEAMS VOICE

Product Overview

WHAT IS MICROSOFT TEAMS VOICE?

Teams and telephony together

Microsoft Teams Voice empowers users to be more productive and collaborative by turning Microsoft Teams into a cloud telephony solution that can be used on almost any device.

Comprehensive managed services and support

Microsoft Teams Voice is backed by an end-to-end managed service which includes support for end-users and management of Direct Routing technology, IVRs, call-queues and more.

How Microsoft Teams Voice works

FEATURES

Everything you'd expect from a traditional PBX solution, only better!

Enterprise quality phone

Get the features you expect from traditional phones including hold, transfer, consult, speed dial, conference calling and more.

Unlimited calls

Unlimited calls to any Australian mobile or landline.

Fully managed service

From initial deployment to ongoing management, we'll keep your phones live without disruptions.

Call anyone, on any device, anywhere in the world

Enable telephone calls from any Australian or international number on any device, including IP phones, Teams room systems, PC, Mac, and mobile devices.

Simplified administration

Fastrack manages those pesky users in the Office 365 admin portal. We provide everything including acquiring numbers, assigning numbers, and more.

Highly available

99.9% uptime for your phone lines with active load balancing.

Simplified identities

Streamline identity management with phone numbers linked to Azure Active Directory.

Reporting

Gain insights into how your people are using cloud telephony, while identifying trends.
