

SIP Trunking

On-demand scale for all your business communications needs

G12
communications

Improve the quality of your communications network by adopting a service that's designed to be more reliable than PRI's. Our SIP trunks are built to scale, can enhance an existing PBX infrastructure, include custom routing, and provide you with a completely customizable networking solution that adapts to your needs and is more reliable than traditional PRI's.

Are you paying for more capacity than you need?

Create a communications network that's consistent with your company's needs using our flexible SIP trunking service. Instantly adapt to higher demand whenever necessary while reducing upfront costs.

Drive more value out of your existing PBX investment. Our SIP trunking service is compatible with certified PBX vendors, including Avaya, Mitel, Cisco, ShoreTel, Panasonic, and many more.

Easily aggregate all remote locations to a single, redundant SIP connection—giving you more flexibility over your communications costs.

Highlights

More reliable than a traditional PRI

Unlimited US and Canadian calling

Global Number Coverage

Certified with Popular (Major) PBXs

"G12 made the transition to SIP trunking easy. Their experienced team of professionals walked us through the deployment process, assisted with the SIP trunk setup, number porting and cutover. It was a very easy process."

SIP Trunking

A digital service for all your network routing needs

Leverage your existing PBX investment

Drive more value out of your existing PBX system with an SIP trunking solution that's compatible with leading PBX providers, such as Cisco, Avaya, and more.

Support for 911 calls

Prepare for emergencies and stay compliant with current laws with 911 and Enhanced 911 (E911) calling capabilities. Emergency calls are associated with the caller's address by telephone number.

Pay for what you use

Eliminate unnecessary expenses every month by keeping your costs aligned with your capacity. Keep your costs predictable with per session pricing.

Scale on demand

Grow from 5 to 1,000 trunks in just seconds. Get the voice and data infrastructure you need—when you need it. Effortlessly increase call capacity whenever you're ready.

Trusted IP infrastructure

Rely on dynamic failover and on-site redundancy. Our SIP trunks deliver calls to multiple IPs or IP providers to prevent outages and keep your communications flowing at all times.

Fully encrypted communications

Effortlessly maintain compliance and ensure the confidentiality of your communications with secure SIP trunking that leverages the TLS/SRTP encryption standards.

24/7 support

Take control of your communications with ongoing support from our team of SIP trunking specialists. Our help desk is available 365 days a year, 24/7.

Rely on flexible infrastructure you can trust with our enterprise-grade SIP trunking service.
