

# Up Perio Scoping. Down Gingivitis.

## New depths of satisfaction for Hygienists across North America.

Great gums afire! The modern dental practice has needed a better solution for charting, tracking and reviewing periodontic patient data. Curve has surfaced an amazingly innovative design with a simplified interface. Our advanced graphical view includes teeth that are drawn anatomically correct, which allows for easier perio charting and increased input accuracy.

### Key Perio Features

#### Innovative design, simplified interface

- An innovative graphical view includes teeth that are drawn anatomically correct for easier perio charting and increased input accuracy
- An optional table view is a great way to quickly see an in-depth overview of a patient's oral health and track periodontal conditions
- Intuitive keyboard shortcuts make it a snap to input all patient data

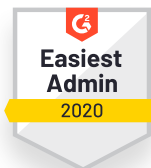

#### Personalized perio exam settings

Customizable perio exam settings enable you to set start conditions, chart specific dental conditions, skip teeth with certain attributes, and update alert values

#### Practical periodontal tools

- Curve Hero contains features that simplify the entry and evaluation of periodontal data including pocket depth, gingival margin, bleeding, calculus, suppuration, plaque, mobility, and furcation
- Periodontal conditions can also be captured by adding a note to an individual tooth
