

Senior SAP Developer

I am already an expert in SAP when it comes to ABAP development, but I'm very eager to take a deep dive into the latest SAP Technologies.

Next to very good working conditions and a competitive salary package, I like to be offered a second home. This includes having French Fries with the team on Friday.

I like to improve through feedback, team sessions and team events.

Characteristics

- Technical curiosity
- Solving complex problems
- Out of the box thinking
- Service-focused
- Innovative mindset

Values

- Trust
- Passion
- Entrepreneurship
- Integrity
- Team spirit

Languages

- ABAP Native
- ABAP OO Native
- JavaScript Business
- SAPUI5 Business

Experience

Senior SAP Developer - 2015 (or earlier) to Present

Small & Medium sized company

- Working on ABAP development, ABAP Dictionary, ABAP OO Transaction Programming, Web dynpro, SAPScript/Smartforms/Adobe Forms, SAP NetWeaver Gateway and Eclipse (ADT).
- Translating functional requirements into technical requirements.
- Creating technical specifications including architectural design in collaboration with the functional analysts and other developers.
- Be the SPOC for the enterprise architect and further improve a good overview of existing architectures.
- Contribute to the technical optimization and consolidation of existing platforms.

Sharing is Caring

- Knowledge-sharing is a key success factor and I am happy to share my expertise with my colleagues, at expert sessions as well as at workshops (both internal as for customers).
- Experience in Developing Front-End Mobile Applications in SAP UI5, Fiori and developing applications in a business context.
- Highest code quality... producing as well as learning.

Special Forces

- SAP Fiori/Web IDE
- SAP Cloud Platform
- Cloud Application Programming Model
- Able to work in a great team of non-binary people.
