

New feature release

Check-in questions keep risk out

Get the answers you need from every visitor and instant alerts to any risk.

Ask all your visitors key questions at check-in

Set custom questions for every visitor to your property. You can add up to 3 questions for each person. They simply tap YES or NO to the answers right after check-in. Answers are all recorded and saved in the property's visitor reports.

Risk Alerts

Any 'unwanted answers' will activate an alert. Property Admins are notified straight away, by app or email, so they can respond in the right way. Getting accurate information fast makes it easier to control risks.

Paperless Protection

- Keep risks out and keep operating
- Minimise costly disruptions
- Avoid periods of staff isolation
- Look after your people

Great for current Covid requirements

A digital check-in process reduces close contact and makes record keeping much easier. Ask about any symptoms or exposure to locations. With biosecurity checks built-in there's an extra level of protection for everyone.

Reduce biosecurity risks on your property

Check-in questions is a new paid feature, available to Property and Company Admins. Choose which sites you need it on, to replace other Kiosks. This sharp new biosecurity tool is designed to protect your people and industry.

Here to help

We're always keen to help you master any Onside feature.
