

# Brandon Calderon

Junior Software Engineer

Hi, I'm Brandon. I'm a junior software engineer with a passion for working on full-stack web development projects. I'm 10 credits away from getting my degree in computer science, and I'm also a recent graduate of DevCodeCamp's, 12-week full-stack developer course.

## SKILLS

## PERSONAL PROJECTS

### Mares Construction - Ecommerce Project (08/2021 - 08/2021)

- Technologies: MongoDB, ASPNet Core Entity Framework, React + Redux, Postman, Node, Mongoose, Axios, Material-UI, Google OAuth, JSON Web Token, EmailJS, Chat Engine, Google Maps.
- The app was built for a small business construction company's ecommerce.

### Music Library - Paired Programming Project (09/2021 - 09/2021)

- Technologies: Django REST Framework, PyCharm, React, MySQL.
- A colleague of mine and I built this project to handle how a user can store, create, update, or delete songs in a library of songs built off of a MySQL database created with Django REST Framework.
