

Brandon Prange

Software Development

I am a lifelong self-learner that can problem-solve and figure things out on my own but perform best in a team environment. My communication skills are well developed having worked in a customer service environment for the past 5 years. With a strong foundation in OOP programming principles and full-stack development, I am looking to utilize all my skills and land a role in software development with a company in the Washington County area.

EDUCATION

Criminal Justice

Waukesha County Tech College

09/2013 - 05/2015

Waukesha, 3.0 GPA

Courses

- Criminal Law
- Forensics

DevCode BootCamp

Milwaukee

09/2020 - 12/2020

Courses

- Full Stack Developer Certificate
- Technologies learned: C#, Python, JavaScript, ASP.NET, HTML, CSS

WORK EXPERIENCE

Tire Installer

Costco

09/2015 - Present

Pewaukee

Achievements/Tasks

- Get vehicles out in the same order they are received.
- Accomplish vehicles with an hour wait time.
- During my time with Costco, we have outdone that time by 25-50% consistently.
- Train new employees on all aspects of the tire shop from machines in shop to teaching them how to sell tires and work with members.
- Knowledgeable about tires to give best recommendation for what the member requires.

Corporal of Marines

United States Marine Corps

08/2013 - 08/2018

US

Achievements/Tasks

- Became a fireteam leader, I was in charge of other Marines that were put directly underneath me.
- Took charge in the field when operations needed to get done. Sending Marines to get certain equipment to ensure the mission gets completed.
- Kept on school curriculum in order to get promoted in the Marine Corps.

SKILLS

Communication

Adaptability / Flexibility

Git, Github

Problem-Solving

SQL

C#, HTML, CSS

PERSONAL PROJECTS

Movie API (11/2020 - 11/2020)

- We used technologies such as JavaScript, AJAX, PostMan, Json, and ASP.NET MVC.
- This project we were able to pull in movies for people to be able to look up movies and see all of their details.

Group Capstone (11/2020 - 11/2020)

- We used a Pusher API in order to have the people using it to be able to communicate with one another and a Yelp API to look up locations and bring up details of them.
- Through this app the users will be able to make plans with their friends and able to communicate with one another.
- Technologies used: Pusher API, Yelp API, Google API, Entity Framework, JQuery, ASP.NET Core MVC, Roles, ViewModels, Services
