Programming Languages & Technologies:

Languages: C#, ASP.NET Core, JavaScript, ReactJS, Python, Django, HTML, CSS, Bootstrap, SQL

• **Tools/IDE's:** Git, GitHub, Postman, Visual Studio, VS Code, PyCharm

Projects:

TacoDex

<https://github.com/carter-willey/TacoWebAppFrontEnd>

Technologies: ASP.NET Core, C#, JavaScript, ReactJS, HTML, CSS, Bootstrap, Google Maps API, Google Places API

Overview: TacoDex is a social media platform based around finding the best tacos in your city! I built this app over the course of a 10-day sprint for my capstone project.

- Allows for users to find new taco shops in their area using Google Maps API. Users can also follow their favorite shops to keep up to date or follow their friends to see what they are enjoying.
- Shop owners can create meaningful interactions with their customers and can get a sense of how good their tacos are by seeing posts related to them.

Star Wars E-Commerce

<https://github.com/CyrusWarner/Ecommerce-Front-End>

Technologies: ASP.NET Core, C#, Javascript, ReactJS, HTML, CSS, Bootstrap

Overview: Worked in a small development team to create an E-Commerce website centered around Star Wars products and memorabilia.

- Users can view all products and their reviews listed on the website.
- Sellers can make postings with detailed product information and post images to our database using base64 encoding.

Education

FULL-STACK SOFTWARE DEVELOPMENT CERTIFICATE | DEVCODECAMP

- Earned: September 2021
