OBJECTIVE

I am a future-oriented software developer with MERN stack development experience. My logical and creative abilities make me a great fit for full-stack development.

TECHNOLOGIES

HTML, CSS, JavaScript, Bootstrap, jQuery, REST APIs, JSON, Git, MongoDB, Express.js, React.js, Node.js, Redux

PROJECTS

Budget Assistant

Key technologies: React.js, Redux, MongoDB, Express.js, Node.js, JavaScript, jQuery, HTML, CSS

Overview: Budget Assistant is a mobile-first web application which allows individuals or groups to record their income and expenses and see meaningful data regarding that information.

Features:

- View income, outgo, and net increase; expected future value; and outgo breakdown by category
- List financial or general goals, set estimated completion dates, and mark goals as completed
- Manage multiple separate budgets with a single account (e.g. personal & business budgets)

Squawk

Key technologies: React.js, Redux, MongoDB, Express.js, Node.js, JavaScript, Bootstrap, jQuery, HTML, CSS

Overview: Squawk is a social media app for bird enthusiasts.

Features:

- Create a user profile and customize your information, including a profile picture
- Request a friend by username or email address, cancel a request, accept or decline an incoming request, or remove someone from your "flock"; see which of your friends are online
- Create posts, edit or delete your own posts, view and like (or undo liking) your friends' posts

EDUCATION

devCodeCamp - *Full-stack web development certificate*

AUGUST - NOVEMBER 2020

Anderson University, Anderson IN - *Bachelor of Music in P-12 Music Education*

AUGUST 2014 - MAY 2018

WORK EXPERIENCE

Kroger, Cincinnati OH - *Support Center Analyst 1*

JANUARY 2019 - PRESENT

- Assisted Kroger associates and contractors with technical problems in the Kroger Support Center's Desktop (later Office and Distribution) team, escalating to appropriate teams when necessary
- Tracked issues and recorded details and troubleshooting with a ticketing system
