## SOFTWARE SKILLS

Javascript

Python

C#

HTML

ASP.NET Core

SQL

Tools/IDE's: Github, Slack, Trello, VS, VSCode, Pycharm, Webstorm, Stack Overflow

Interests: Full-Stack Development, Web Development, Software Development

## PERSONAL PROJECTS

### Bar & Billiards - Personal Capstone

- <https://github.com/joshuahoey/Capstone>
- Technologies: React, Django, MySQL, Postman, HTML, CSS and React-Bootstrap.
- Created an application for Stroker's Bar and Billiards for customers to see events held, reserve a table/event, contact management instantly on the contact form and what the bar itself has to offer.

### Star Wars E-Commerce - Group Capstone

- <https://github.com/joshuahoey/StarWarsECommerce>
- Technologies: C#, React, Postman, React-Bootstrap, VSSQL, HTML and CSS.
- Created an E-Commerce application that acted as a Star Wars E-Bay where users could buy and sell items from the Star Wars universe.

### Music Library

- Front End - [https://github.com/joshuahoey/Music\\_Library\\_React](https://github.com/joshuahoey/Music_Library_React)
- Back End - [https://github.com/joshuahoey/Music\\_Library-](https://github.com/joshuahoey/Music_Library-)
- Technologies: Django, React, MySQL, Postman, React-Bootstrap, HTML and CSS.
- Created a music application that users could see music that they had, add/delete music, and filter.

### YouTube Clone

- <https://github.com/joshuahoey/YouTubeClone>
- Technologies: Python, React, MySQL, Postman, React-Bootstrap, HTML and CSS.
- Created a web application that acts as YouTube where users can search for a video and get the first response on the site, it's description and the top five related videos to the video being watched.
