ECOsurfaces

## Can a floor do more? Yes.

Since 1871, Ecore has been transforming reclaimed materials into performance surfaces that make people's lives better. What started with simple cork closures has evolved into a diverse portfolio of products solving complex problems in applications ranging from playgrounds, weight rooms, and turf fields to hospitals, hotels, and retail environments. We are driven everyday by a simple question, "Can a floor do more?" At Ecore, we believe the answer is "YES." We are building our company and the products we offer based on the simple notion that floors should elevate beyond current expectations. Our energy is focused on the interaction between people

and the surface. We engineer performance well beyond industry standards related to acoustics, ergonomics, and safety. Harvesting the unique power from a myriad of waste streams, Ecore creates products that align—substantial force reduction with a balanced amount of energy restitution to create dynamic surfaces that are tailored to the individual and the application.

People will fall... we will be there to catch them! Professionals will overwork their bodies... we will soften the blow! Footfall sounds will keep someone awake... we will quiet the noise!

# ECOSurfaces

ECOSurfaces is a distinctive vulcanized composition rubber surface. Available in traditional rolls and tiles, this resilient surface has beauty and brains. In addition to being available in more than 30 bold, rich colors, ECOSurfaces offers many benefits.

Versatile, durable, and sustainable — ECOSurfaces has been a staple in the commercial flooring market for more than 30 years.

## Markets

- Corporate
- Education
- Institutional
- Retail

## Dimensions

**3.2mm Rolls**  
48" (1.22m) x 50 LF (15.24m)

**3.2mm Tiles**  
24" (61cm) x 24" (61cm)

## Benefits

- Durable – features ECOguard coating
- Slip Resistant
- Better acoustic properties than traditional resilient surfaces
- Ergonomic – comfortable underfoot
- Sustainable
