

FOCUS ON THE MISSION, NOT ON SPREADSHEETS

The world of grant-funded projects has changed.

Funding sources are requiring accurate accounting of time and dollars spent on their grant. Estimates and Excel spreadsheets won't cut it anymore. Audits are now a matter of when, not if, and you need to quickly provide award budget vs. actual labor and expense reports.

GrantAlytics is the only grant budgeting and management solution fully integrated with ADP time & payroll modules.

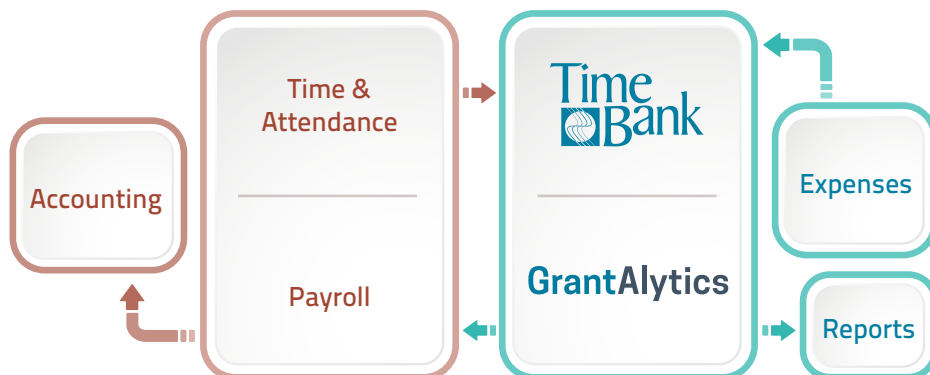

Non-profits, Research and Development, and other grant-based organizations with integrated TLM, Payroll, Expenses and Dashboard data can quickly gain clarity on *how* grants are performing and *why* with actual data, not estimates.

Features include non-labor expense import capability and milestone and outcomes tracking.

Now you can gain perspective on your budget and management of all grants, a selection of grants or an individual grant. Armed with accurate data and projections, you can help improve the effectiveness of your grants to optimize the mission.

It's time to get you back to:

- **Supporting** your mission
- **Managing** your grants proactively with accurate forecasting information
- **Delivering** reports to your funding sources on time and with confidence
- **Better visibility** and insight across all of your funded projects
- **Maximizing** the usage and effectiveness of funds

It's time to...

- **Achieve** better visibility of labor effort, funding balances, wage allocations
- **Attain** the ability to take corrective action based on labor and expense trends
- **Increase** productivity for you and your staff
- **Increase** inbound funding/grants
- **Increase** confidence in justifying your grant performance data
- **Increase** your ability to quickly deliver ad-hoc reports

- **Decrease** uncertainty of grant performance
- **Decrease** anxiety related to audits and seeking funds
- **Eliminate** inaccurate spreadsheets
- **Eliminate** duplication of effort
- **Eliminate** the need to manually tie together multiple data sources
- **Eliminate** worry when you can't produce ad hoc reports and grant status

GrantAlytics users add value to the organization and its mission.

- **Feel confident** and satisfied that the organization is addressing your mission not administrative tasks
- **Get peace of mind** that your grants are performing against budget (more funds and better results for your stated mission)
- **Save time**, money, effort and anxiety from audits
- **Have answers** and information to provide ad hoc reporting and grant status updates

Free yourself and change the world.

GrantAlytics is a service developed and supported by IDI, an industry leader in employee data integration solutions for over 30 years. IDI's business is built around enhancing our client's investment in their workforce management systems and extending our partners solutions.

Our solutions **enable over 25,000** clients across North America to integrate HR applications and automate business processes.
