

# 2021 Volkswagen ID.4

Free Rolling Vehicle - There are **two** pathways to free roll the ID.4 for loading to a carrier

Prior to deactivating anti-roll, make all connections to tow vehicle to prevent roll away

Enter the vehicle with key fob and depress foot brake. Shift vehicle to neutral by pulling the top of the shifter one click towards you.

The dash cluster will indicate **Neutral (N)**.

Infotainment screen will prompt you to deactivate anti-roll. Select **OK**.

Infotainment screen will indicate vehicle is now able to roll.

Instrument cluster will also indicate vehicle is now able to roll.

To turn off roll function, place vehicle back in park by pressing the park button on the shifter.

## Infotainment Pathway

Prior to deactivating anti-roll, make all connections to tow vehicle to prevent roll away

In the Infotainment screen, select **Vehicle**. Swipe through menu if widgets have been rearranged.

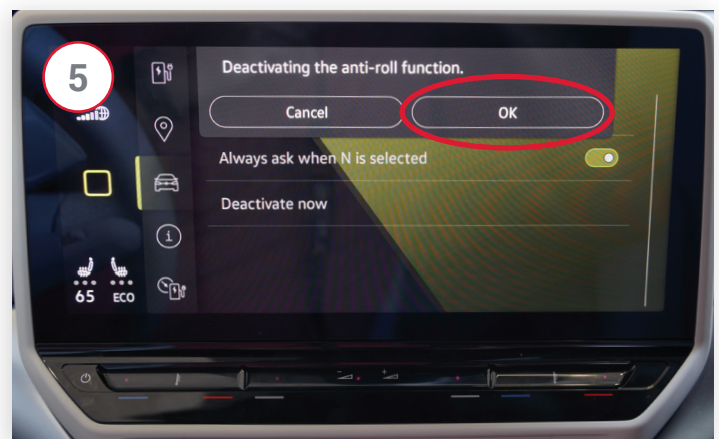

Select **Exterior**, then swipe left.

Select **Brakes**.

Under anti-roll function, select **Deactivate Now**.

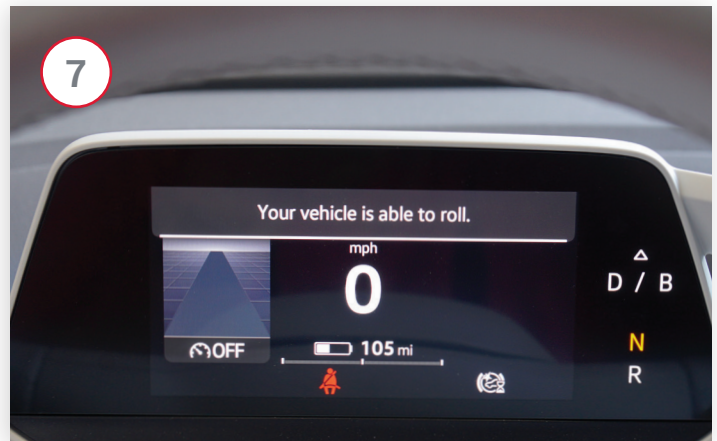

Select **OK**.

## Infotainment Pathway continued

Infotainment screen will indicate vehicle is now able to roll.

Instrument cluster will also indicate vehicle is now able to roll.

To turn off roll function, place vehicle back in park by pressing the park button on the shifter.  
Select **Park** during transport
