

2021 Volkswagen ID.4

Towing

See Tip Sheets – Mechanical Key Entry & Free Rolling Vehicle for complications

The VW ID.4 should only be towed on a flat towing bed.

Tow eyelet provision in front bumper

Roadside kit under load floor in trunk

Tow eyelet is left-hand thread

Rear tow eyelet provision is not present in bumper beam of all models.

Rear towing on RWD vehicles should use t-hook.

Rear towing on AWD or first edition vehicles should use tow hitch.

Disclaimer

Do not tow by the axle or any other components other than the dedicated tow attachment points (i.e. t-hook, tow eye, and tow hitch). Using any other attachment points can damage the suspension, charging components, or other areas of the car.

Additionally, do not tow a vehicle without electrical power. This will immobilize the vehicle.
