

# Money in Your Employees' Hands Faster

The top priority for businesses in 2021? Getting people paid quickly. Your employees need their wages as soon as possible, so they can properly budget, save, and pay bills on time. Traditionally, adjusting pay cycles has been expensive and a heavy lift for payroll teams. With Branch + RASI, there's finally a simple, free way.

By implementing Branch, your employees can **get paid the day after their work week ends** — with no payroll changes, pre-funding, or additional work on your end.

Featured Partner

Easy, integrated, and best of all, free way to eliminate the cost of live checks.

## Pay employees the day after the work week ends

### Process Payroll

Simply process your payroll as normal — no changes needed.

### RASI Process + Validates

Once your payroll is processed, RASI will validate and submit payroll data to Branch.

### Employees Get Paid!

After receiving payroll data from RASI, Branch pays your employees — with no pre-funding or cash flow changes.

### Branch ACH

The following day after your employees have been paid, Branch simply debits your account for the total amount paid out to your employees.

Monday

Tuesday

In this example, we used a Monday to Sunday work week, with payroll submitted Monday before 2PM MT. The employees are paid out on Branch on Monday and the funds are debited on Tuesday

Employees get paid the day after the work week ends, and employers see these benefits:

- + Increased employee satisfaction
- + Decreased turnover
- + Cost savings on live checks
