

SANITIZER - COMPATIBLE TOWELS & TOOLS

Hygen™ Microfiber

Microfiber in general has a great ability to remove soils from surfaces. However, not all microfiber is created equal. Rubbermaid Microfiber has been proven in independent labs to remove 99.7% of tested viruses and bacteria with water only.* We are NOT saying you should use water only to clean, but think about the amazing results you could get by utilizing this top-notch microfiber with an appropriate detergent and/or disinfectant!

The new disposable microfiber is compatible with bleach, quat and hydrogen peroxide disinfectants and has built-in scrubbing strips to help remove dirt more effectively. The new disposable cloths and mops help reduce cross-contamination because they can be thrown away after each area or task. They can be used dry or wet.

Hygen™ Disposable Microfiber Cloths (029140 – 60 ct)

Hygen™ Disposable Microfiber Cloth Charging Tub (029160)

Hygen™ Disposable Microfiber Pads – 18 in (029150 – 50 ct)

Hygen™ Pulse™ Microfiber Spray Mop Kit (020570)

Hygen™ Quick Connect Frame – 17 in (020478)

Hygen™ Quick Connect Handle – 58 in (020408)

*Based on third-party testing with water only; Tested Virus: Feline Calicivirus (surrogate for Norovirus), Common human coronavirus OC43 (not tested on SARS-CoV-2, the virus that causes COVID-19). Tested Bacteria: MRSA, Pseudo, C.diff

CHICOPEE® Sanitizing Towels

Pro-Quat® Foodservice Towel

Medium Duty
Red with Red Stripe - 13x21 in
(049320 - 1/150 ct)

Consistently releases the required PPM of quat sanitizer or disinfectant to surface and features Microban® antimicrobial protection.

S.U.D.S.® Single Use Dispensing System

Bucket with Lid (359451 - 1/1 ct)
Towel Refills (049795 - 6/110 ct)

Engineered to yield superior liquid absorption and debris pick-up. Add your own cleaning, sanitizer or disinfectant solution. Compatible with quat or chlorine.

Quix® Plus Sanitizing Towel

Medium Duty Pink – 20x13.5 in
(049310 – 1/72 ct)

Pretreated towels that are perfect for foodservice cleaning and sanitizing applications, especially in the absence of automatic chemical metering systems or when handling highly concentrated chemicals is not desired. Simply add the towels to a specified amount of water and watch as the solution transfers from the towel to the water, making it easy to consistently achieve the proper sanitizing strength every time to ensure your establishment maintains the highest standards of cleanliness.
