

# — YOUR ONE SOURCE FOR — **FALL PROTECTION**

**MAZZELLA IS A LEADING SUPPLIER AND INSTALLER OF ENGINEERED FALL PROTECTION SYSTEMS IN THE U.S. WE ALSO PROVIDE FALL PROTECTION SOFT GOODS, SUCH AS HARNESSES, LANYARDS, SELF-RETRACTING LIFELINES, SCAFFOLDING, NETTING ... AND MORE!**

All Mazzella engineered fall protection systems and products meet or exceed the federal criteria required by OSHA and ANSI and can be customized with your individual fall protection and financial needs in mind. We can also meet or exceed industry-specific safety requirements. We specialize in site analysis and evaluation, as well as employee training for equipment installed or products sold.

ANCHORAGE

BODY HARNESSES

CONNECTORS

CONFINED SPACE

LIFELINE SYSTEMS

GUARDRAILS

HANDRAILS

DECELERATION DEVICES -  
CLASS 1 SRLs

DECELERATION DEVICES -  
CLASS 2 SRLs

We also offer basic and competent fall protection training, system inspection, documentation storage, and procedure development / rescue plans. We are a master distributor for 3M, Gorbelt, Reid Lifting, TUFF BUILT, Tractel, and Rigid Lifelines ... just to name a few.

## **FALL PROTECTION TRAINING**

Our basic and competent person fall protection courses are an ideal resource for businesses in industries that require height compliance safety training. On top of our training, we also provide fall arrest and fall restraint systems and products — lifelines and lifeline systems, harnesses, confined space equipment, lanyards, anchor points, Class 1 and Class 2 SRLs ... and more! These products meet ANSI regulations, as well as EN and Canadian codes.

## **FALL PROTECTION INSPECTION**

OSHA 1926.502 and ANSI / ASSE Z359.2 standards require your fall protection equipment be inspected, at a minimum of once a year, by a “competent person” who has been certified for that specific task by their employer. We provide inspections for personal fall protection products, as well as engineered lifeline systems. Our in-house inspection team has decades of experience, and they can help you comply with OSHA, ASME, ANSI, and industry-related standards and keep your workers safe while working at height.
