

Faster Payments.

Make payroll payments in seconds, not days.

Our new real-time payment solution provides simple, secure and affordable access to UK Faster Payments. Send payments instantly - and remove the costs, risk and time pressures imposed by traditional solutions.

We live in a world where people expect everything to be instant. In our personal lives, we have digital access to our funds 24/7/365 via our smartphones, letting us make payments anytime, from anywhere.

Payroll payments, however, are still typically made through the traditional BACS process, which can take up to three days.

With our new Faster Payments solution, it takes seconds to make payments, rather than days - giving you a little breathing space to ensure that your employees are paid accurately and on-time.

“We are very excited to be introducing customers to the incredible speed and efficiencies of Faster Payments. Bringing in Income Group’s leading payments solution and connecting through IGsend to Mastercard’s payment network is just one of the ways in which we are working to meet the evolving needs of modern business, and keeping pace with consumer-grade experiences.”

John Petter, CEO of Zellis

How it works

Our payroll software, ResourceLink, integrates seamlessly with Income Group’s platform, IGSend, to enable Faster Payments. Income Group’s IGSend platform is underpinned by Mastercard’s technology, while Starling Bank manage and process all salaries into employee bank accounts.

Why choose Faster Payments?

Pay instantly, whenever you need to.

Available to use 24/7, 365 days a year, Faster Payments lets you process your payroll whenever you need to. Gone are the days of Monday-Friday timetables, with the stress of early payments due to weekend pay dates. Plus, avoid any penalties associated with late payments.

Make accurate payments, every time.

Removing the BACS process extends the payroll deadline by a minimum of two days, giving you more time to process last-minute changes, conduct additional report checking, and correct data. The result? A more accurate payroll, every time.

Make your payroll more cost-efficient.

Running a more accurate payroll reduces your need to rectify costly errors such as over- and underpayments using the expensive CHAPS process. Instead, take back time to focus on more strategic tasks and feel confident that payroll is supporting healthy cash flow in your organisation.

Reduce your compliance risk.

The overall decrease in payroll mistakes reduces the risk of reputational and financial damage to your organisation. This includes the risk of employment law regulation breaches, such as National Minimum and Living Wage.

Deliver exceptional employee experiences.

Providing your employees with more reliable and accurate payments helps to support employee motivation and retention. It also helps to protect the financial well-being of certain employees that need to be paid more frequently, such as shift and gig workers.
