CASE STUDY

A Five Star Maturity Plan - Threat Management Based in Trust

> Curated threat feeds can be a commodity. It's the threat intelligence that's well enriched, meaningful and trusted that's valuable.

About ReversingLabs

ReversingLabs is the leader in cloud-delivered object security, addressing the latest attacks, advanced persistent threats and polymorphic malware. ReversingLabs has become an essential threat solution across the most advanced security companies in the industry, while supporting all industries searching for a better way to get at the root of the network, endpoint, and application threat problem, of which complex objects have become the major risk contributor.

LEARN MORE

Introduction

ReversingLabs helps companies accelerate their cybersecurity initiatives with quality threat intelligence.
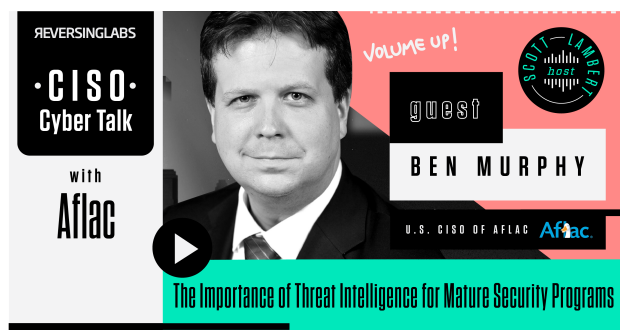

Challenge

- Shift from a compliance to a threat focused mindset
- 6 year journey with independent risk assessments, asset discovery, curated threat intelligence
- Lacked proactive and actionable threat intelligence

Solution

- Built own Threat Management Platform: Splunk, 20 TI Feeds
- Moved beyond standalone TI Feeds with Homegrown "Dirty Lab"
- Augmented intelligence by evaluating file samples using ReversingLabs

Results

- Reduced manual analysis efforts using automated reverse engineering of files
- Elevated trust in threat intelligence given source of the data
- Execute in a much more proactive manner being better prepared for what's next
