Disclosure: This illustration shows the minimum adjusted income for a single individual investing at age 60 assuming no withdrawals for 5 years. It utilizes B-share contracts and does not apply state variations. It does not account for any potential step-ups that could generate a higher income, especially for those benefits that allow a higher percentage of equity exposure, as well as the benefits that allow stacking. Current as of April $1^{\text {st }} 2019$, withdrawal percentages and roll-up rates are subject to change.
Income Rate: Individual investing at 60, benefit base increasing by guaranteed roll up rate, then withdrawing money at 65 for life at income rates. Showing income rate from initial investment.
Possible Decrease: Income rate can decrease if account value is depleted
Other Products may perform better subject to market risk, product cost and investment options
